EVERYDAY CARRY

TACTICAL

Proprietary technology, functionality and modularity are all important factors when creating an armor system. Safariland worked with Fort Worth SWAT to create a revolutionary, lightweight, low-profile tactical platform for those who deserve nothing but the best. HYPERX offers a customizable fit that boasts adjustable ballistic rifle protection while maintaining a thin and lightweight profile. Available in three base platforms depending on ballistic requirements, all vests are engineered for mobility, focusing on reducing weight and improving flexibility without compromising protection. The system comes standard with both First Spear Tubes and Velcro closures on the front cummerbund, which the user can use together or independently, and includes an adjustable Shock Cord with a detachable center anchor extending the range of adjustment on the vest. Finally, an armor platform built to meet the needs of today's Law Enforcement and Safety Operators.

01

HYPERX® HYBRID TACTICAL CARRIER

The HYPERX Hybrid is purpose-built for our best soft and hard armor. This armor hybrid creates a solid in conjunction with system (ICW).

02

HYPERX® FC FULL COVERAGE PLATFORM

Offering the same great purpose-built and adaptable features of the original HYPERX Hybrid, the Full Coverage offers additional soft ballistic protection throughout the upper shoulder and girth.

03

HYPERX® SA STAND ALONE PLATFORM

Completing the HYPERX line, the Stand Alone (SA) offers additional compatibility for a variety of stand-alone plates which may prove to be thicker by design.

ASSAULT SHIELDS

01

ASSAULT II LW

The Assault II LW Shield line integrates Level III rated rifle protection in a lightweight profile. Utilizing the latest technology in UPMWPE materials from Honeywell, this shield features a triangular viewport that allows for increased vertical visibility for the operator. Capable of stopping the 7.62 x 51mm, 147 gr. M80 FMJ (NATO), the Assault II LW is ideal for both tactical teams and patrol officers weighing in at only 14.8 lbs.

02

ASSAULT III LW

Utilizing the latest technology in UPMWPE materials from Honeywell, the Assault LW features a triangular viewport that allows for increased vertical visibility for the operator. Capable of stopping the 7.62 x 51mm, 147 gr. M80 FMJ (NATO), the Assault III LW is only 20.4 lbs. providing additional ballistic coverage area when needed.

03

ASSAULT II VP

A modern take on the widely known Assault line of shields, the Assault II VP integrates lightweight Level III protection with a triangular ballistic viewport capable of stopping 7.62 x 51mm, 147 gr. M80 FMJ (NATO) rounds. The Assault II VP is ideal for tactical teams and patrol use, coming in at just 20 lbs. and a compact 16" x 30" build. This combination of visibility and lightweight rifle protection elevates the Safariland Level III shield portfolio. Crafted from a polyethylene composite to provide a high-quality look & feel, the Assault II VP provides the needed vertical visibility when approaching dangerous situations. NIJ 0108.01 compliant, the Assault II VP is also capable of stopping five impacts of the 5.56 x 45mm M193 and 7.62 x 39mm MSC special threat rounds.

ASSAULT III VP

Safariland is taking our bestselling Level III rated shield line, the Assault VP to the next level. Increasing in size and adding handle options, the Assault VP shields are now offered in a 20" x 36" cut and with the well-known FoxFury® B70 Integrated Light Horizontal handle. Extending ballistic coverage for more versatile applications, the Assault III VP will come standard in a 20" x 36" cut starting at 26.9 lbs with a 14" horizontal handle.

01

LIBERATOR IV ADVANCED SINGLE COMM HEADSET

The Liberator® IV is the first top-tier tactical single comm headset to offer cutting-edge multi-mode operations and a dual fuel system. Engineered to excel in high-noise environments, the Liberator IV offers tailored operational modes to safeguard against impulse noise like gunfire and steady-state noise like helicopter operations. Further advancing Liberator IV functionality, user-customizable audio profiles accessible via a simple keystroke on the headset allow audio adaptability for advanced environmental awareness. Experience unimpeded communications with mission-focused engineering for challenging terrains, unparalleled comfort for extended missions, and the durability to carry on through any situation.

02

6354RDS ALS® TACTICAL HOLSTER

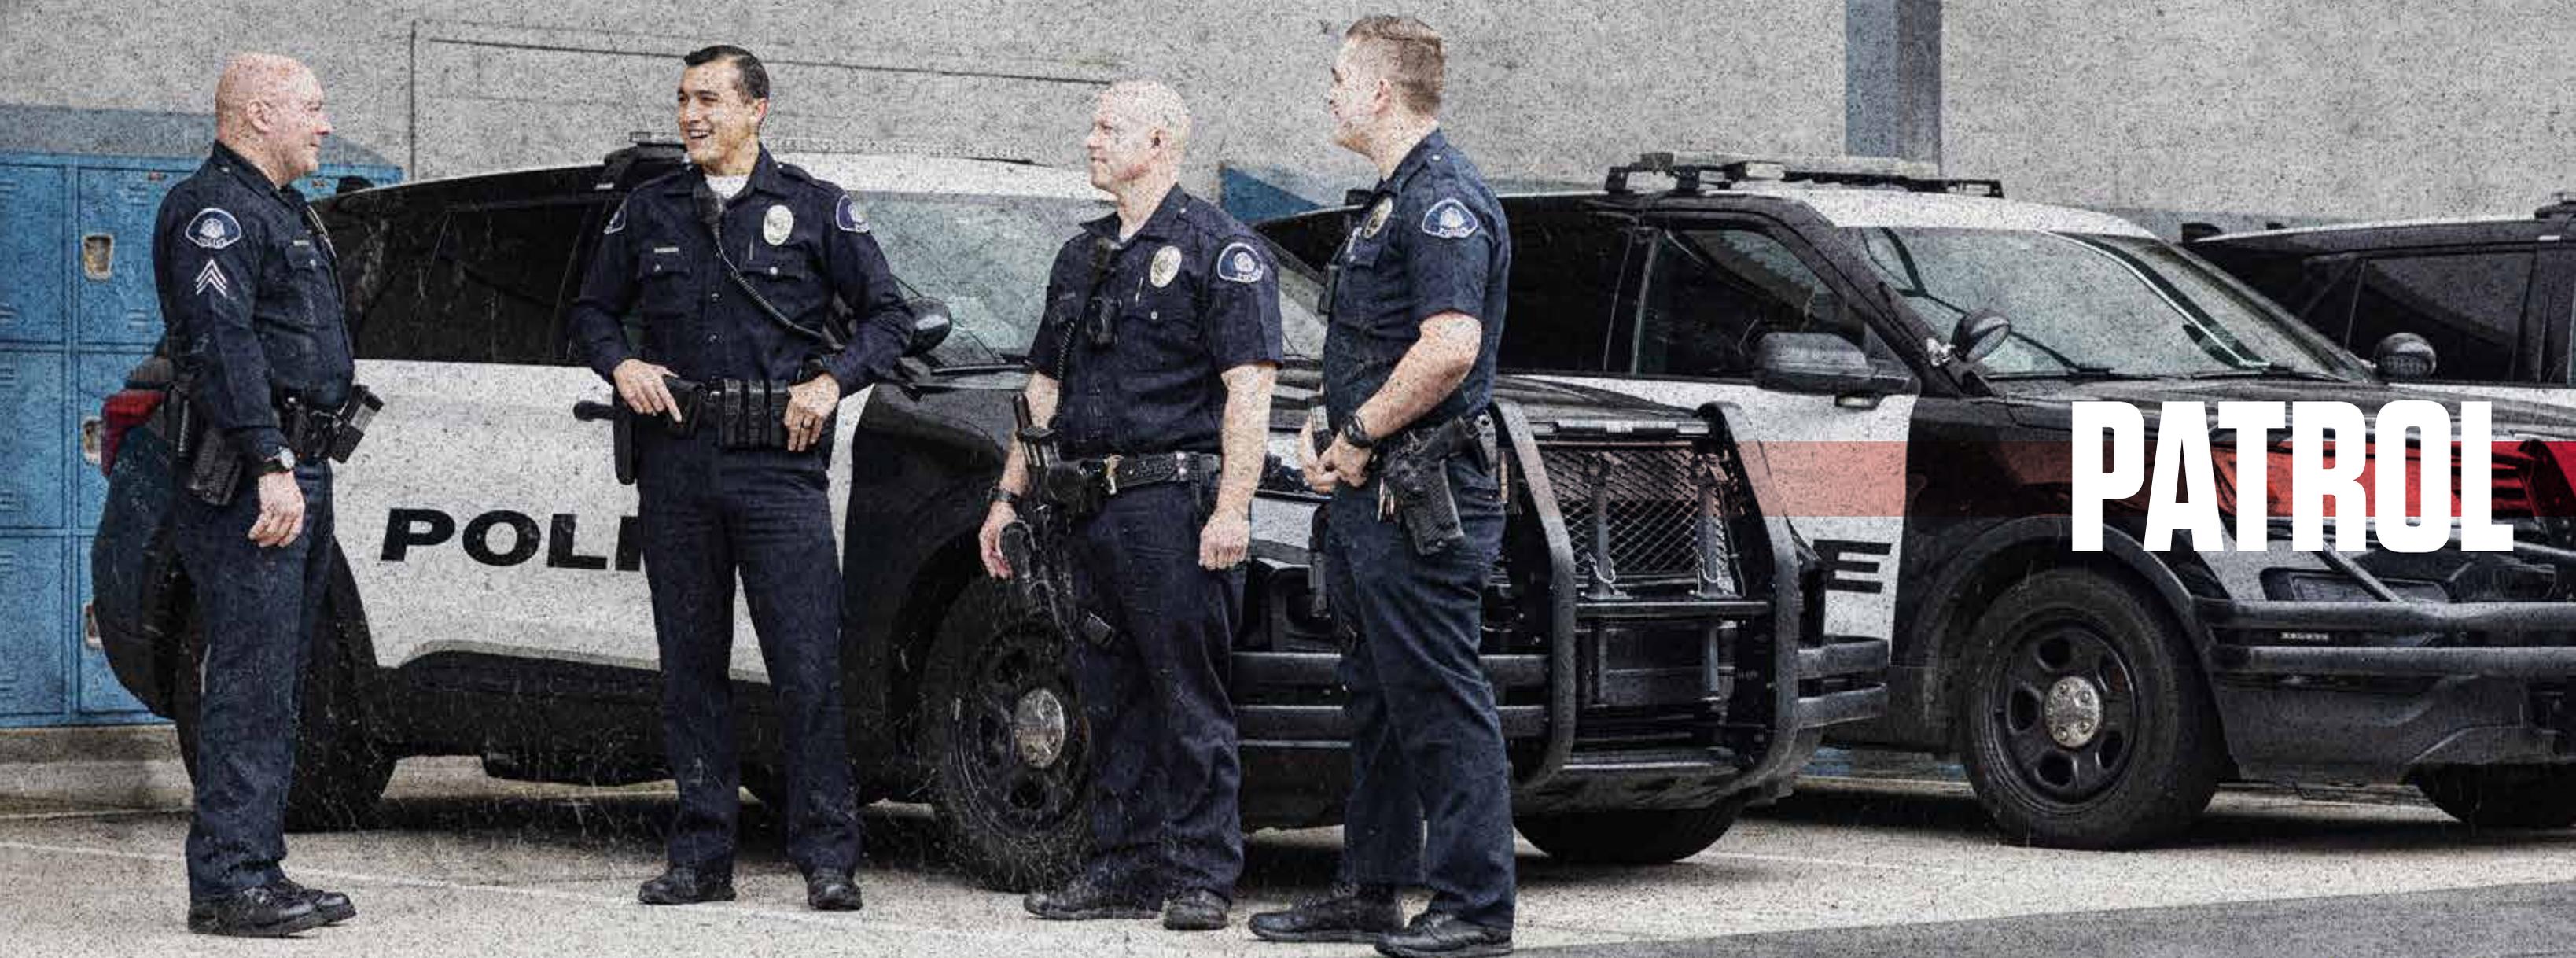

The 6354RDS holster is specifically designed for firearms with red dot sights mounted to them. This model features the Automatic Locking System (ALS®), an internal locking device that retains the firearm in all directions providing active retention in an open-top design for tactical use. The SafariLaminate™ thermal-molded construction provides durability while the SafariSuede™ lining helps protect the firearm's sights and finish. The lightweight double leg strap and the leg shroud grant additional comfort and stability.

03

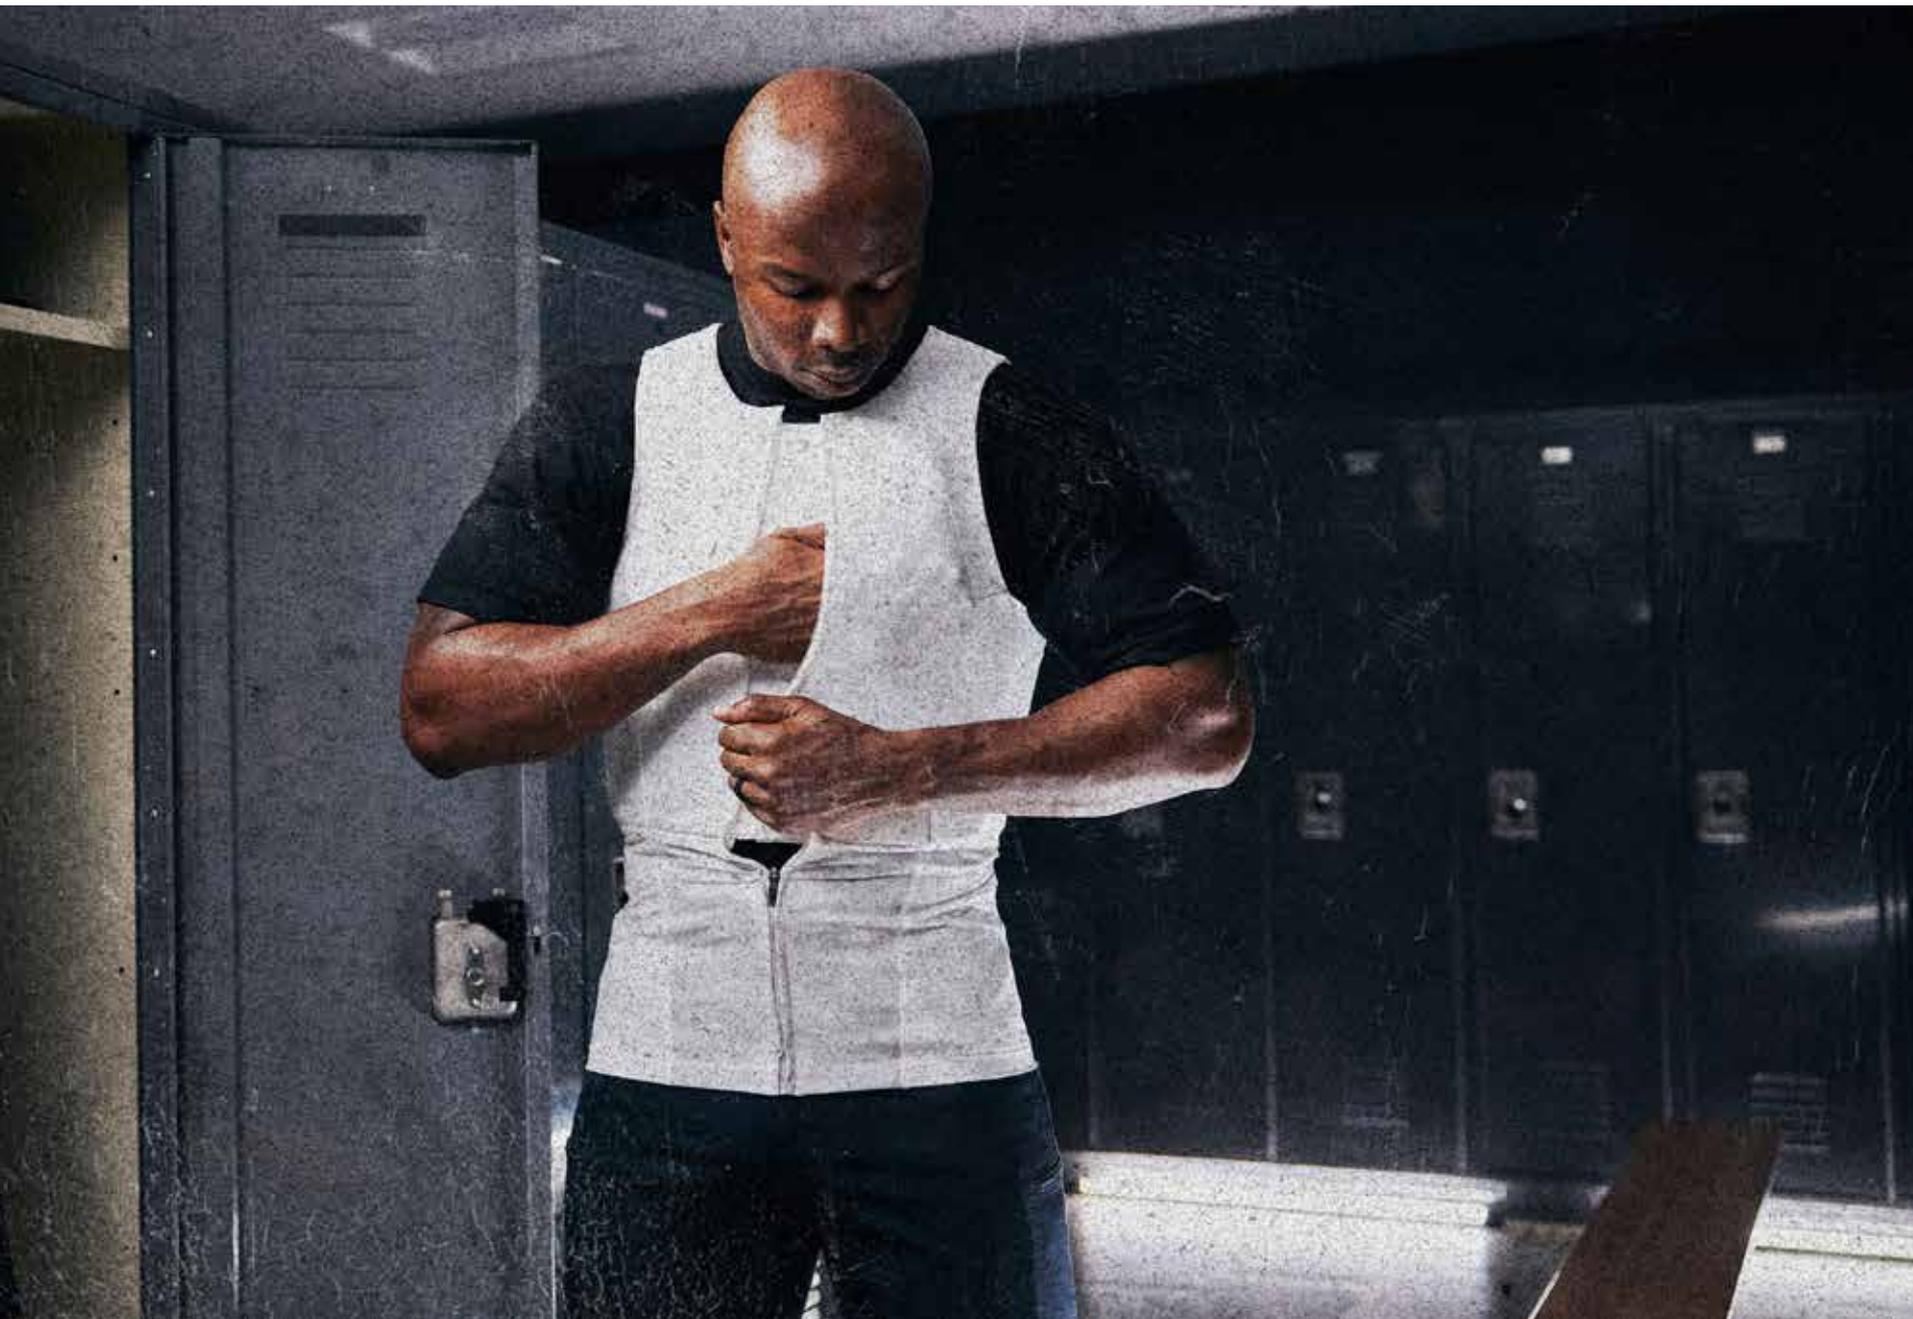

SAFARIVault® HOLSTER

SafariVault™ - The strongest holster body Safariland has ever built. Its increased structural integrity withstands higher forces and impacts from any direction. SafariVault's improved ALSTM design reduces flex and increases crush resistance. The all-new self-clearing optic cover accommodates closed and open emitter pistol optics, while a magnetic holstering guidance system stabilizes the slide while holstering. The intuitive design speeds up time to target and ease of reholstering. SafariVault's open muzzle design provides clearance for threaded barrels or compensators and allows debris or brass to pass through.

PATROL

APEX® COVERT CARRIER

Introducing APEX, a groundbreaking concealable body armor vest system that redefines the standards of agility and comfort for those who dedicate their lives to safeguarding others. Inspired by the evolution of sports performance and designed to meet the dynamic demands of law enforcement, APEX is not just a carrier – it's a paradigm shift in personal safety.

At the core of APEX lies a revolutionary 4-piece carrier design that seamlessly integrates two side panels with front and rear counterparts. This unique configuration allows for unparalleled articulation, ensuring the armor moves fluidly with the body, offering coverage during every twist and turn of duty.

Say goodbye to the cumbersome Velcro and elastic of the past. APEX embraces cutting-edge compression fabric zones and a front zip for confident donning and doffing. These zones not only enhance flexibility but also distribute the weight of ballistic panels around your body's core, reducing fatigue and providing a more natural way to carry the load.

EXT CARRIERS

Gear up with the all-new EXT™ External Carrier System - engineered for those who demand the best. Inspired by our top-performing carriers, the EXT line of carriers is here to elevate your performance on the field.

FUNCTIONAL DESIGN

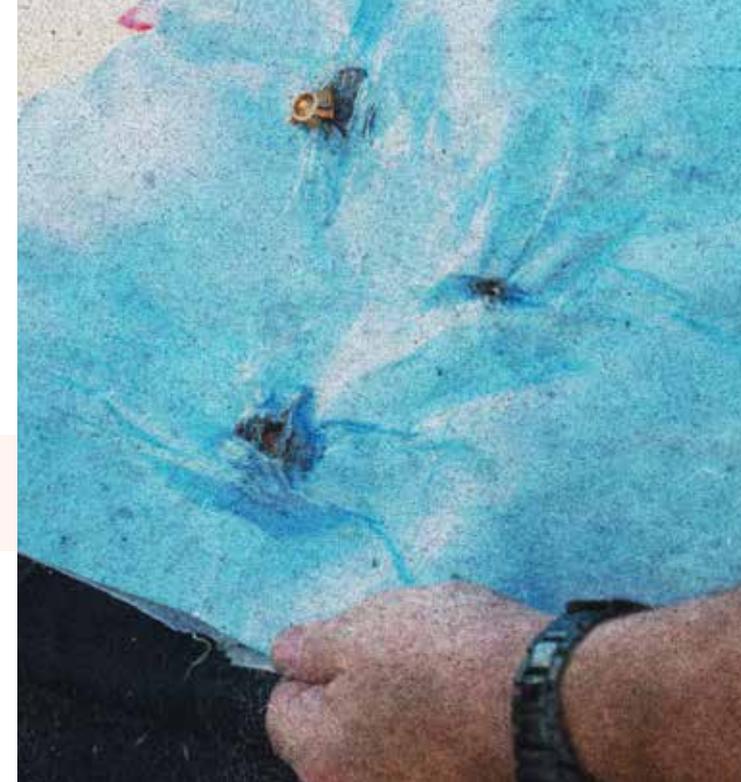

Experience unparalleled comfort with adjustable ergonomic straps that seamlessly integrate into the upper shoulder, leaving no room for distractions. EXT External Carriers guarantee a no-nonsense, professional appearance without the hassle of exposed hook and loop.

CUSTOMIZE YOUR AUTHORITY

Loaded with features for the modern officer, including laser micro-cut mic tabs and an array of functional chest pockets and slots for all the essentials—from body-worn cameras to pens and everything in between. Integrated wire and comm channels and customizable badge and ID placements ensure gear stays secure, no matter the mission.

UNMATCHED VERSATILITY

Available in a wide range of load-barring and uniform styles, The EXT Carrier System can be tailored to departmental preferences and operational needs. The built-in front and rear in-conjunction-with (ICW) combo plate pockets support a wide range of plate sizes and hydration pouch systems. The addition of an integrated elastic side cummerbund offers enhanced stretch for superior comfort and adjustability.

HARDWIRE
ARMOR SYSTEMS

Hardwire® 57 Level IIIA Ballistic Panel NIJ Model No. BA-3A00S-HW01

Hardwire's entry into the soft ballistic market in collaboration with Safariland in 2016 brought a revolutionary advancement in armor technology. Thousands of officers embraced the innovation, drawn by its unparalleled lightness, comfort, and quality. As a result, Hardwire quickly became a key supplier of soft armor to domestic law enforcement and the U.S. military. Enter the Hardwire Level 3A .57 PSF system—a game-changer in ballistic protection. Significantly lighter and thinner than its predecessor, this armor retains its crown as the world's lightest. The secret lies in Hardwire's signature stitch-less design, groundbreaking shock absorption technology, and high-pressure construction, now infused with a stronger, next-generation fiber. Combined with fully automated robotic production, Hardwire ensures unmatched precision and quality in every piece.

BALLAST

BALLAST™
DUTY HOLSTER

Decades of feedback and design improvements have shaped Safariland's most advanced Duty Rated Holster for law enforcement professionals. Ballast's lightweight and durable design stands up to the toughest conditions, from very high heat and low cold tolerances, maintaining structural integrity from 160 F to -50 F. A proprietary crush-resistant design shields Ballast's internal components and Safariland's new Ingress Guard further protects the trigger inside the holster.

An internalized ALS lever lock spring shields Ballast's core security mechanism and the removeable RDS Optic lid protects lens from impact. The textured ALS lever allows for improved thumb contact and ergonomics. And for added versatility, a redesigned cantable UBL belt mount that supports 15° forward or rearward angles or vertical alignment for maximum comfort and an efficient draw stroke. A modular muzzle endcap allows for different slide lengths, threaded barrels, and compensators, while the open design provides easy pass-through of debris.

With a minimalist footprint, Ballast maximizes duty belt efficiency, allowing patrol officers to carry full-sized firearms without sacrificing belt space. The Ballast holster is compatible with all Safariland 3-hole pattern holster mounts and accessories. Trust the Safariland Ballast — your stabilizing force for every shift.

SX™HP Level IIIA Ballistic Panel

Experience the next level of personal protection with the Safariland SX™ HP, the thinnest, lightest, and most protective hybrid ballistic armor on the market. Engineered with groundbreaking technologies and cutting-edge materials from Avient®, Honeywell®, and Dupont® to provide a 20% weight reduction and a 20% increase in ballistic performance. Available in male and female unstructured styles, with an additional female structured option for precise, tailored protection. The updated design enhances concealability and ergonomics, ensuring maximum comfort for even the most discerning officers. Discover next-level protection without compromising on comfort or safety. The Safariland SX™ HP redefines what's possible in ballistic defense.

01

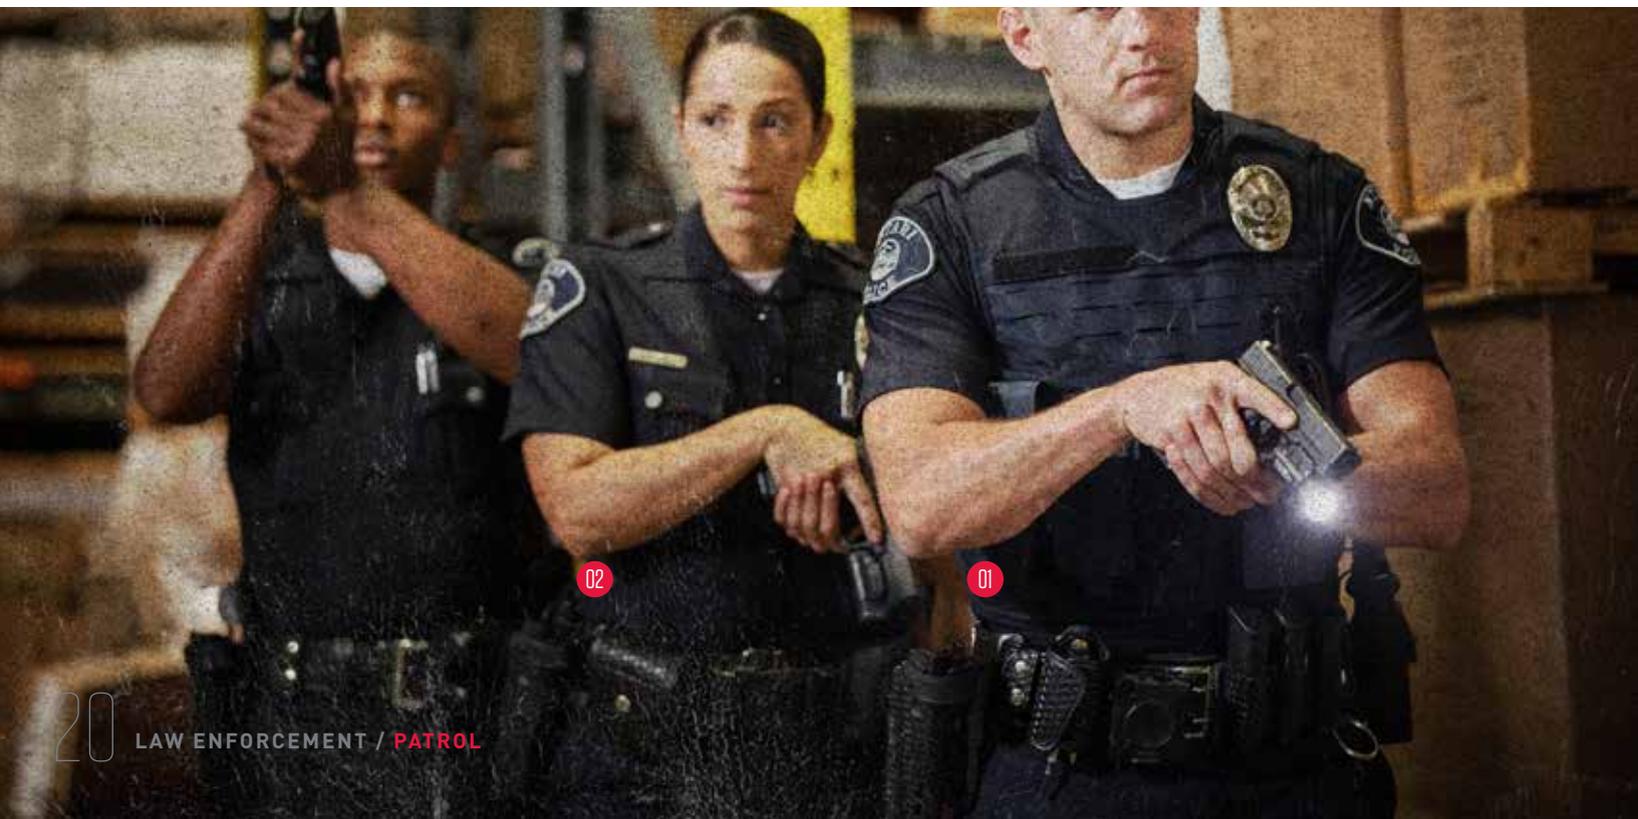

M2 COVERT CARRIER

The M2 carrier is the ideal balance between functional design, durability, comfort, and value. Made of a highly durable, washable hexagon ripstop fabric, it has a front-opening zipper to easily install ballistic panels. For improved comfort, the vest incorporates a “Zero Edge” no-binding design around the perimeter of the carrier. Other highlights include a new ergonomic welded elastic strap system and a nylon-based antimicrobial mesh liner to ensure comfort and mobility for all-day wear.

02

M2 + COVERT CARRIER

The M2+ introduces all-day rifle protection with its upgraded top-loading front and rear plate pockets. Made of a highly durable nylon ripstop fabric, it will accommodate the IMPAC C1 and P1 ICW plates measuring up to 8” H by 10” W. The M2+ also incorporates many of the standard M2 features, like a front-opening zipper for easy installation of ballistic panels, ergonomic strap kits, and a “Zero Edge” no-binding design.

03

6360RDS ALS®/SLS MID-RIDE, DUTY RATED LEVEL III RETENTION™ HOLSTER

The 6360RDS holster is specifically designed for firearms with red-dot sights mounted. This holster, with the Automatic Locking System (ALS®), builds on the foundation of the Self-Locking System (SLS), providing Level III Retention with three distinct hand movements required to clear the security mechanisms before the firearm can be released. The ultra-durable SafariLaminate™ thermal-molded construction protects the firearm and sights, while the suede-lined interior preserves the handgun's finish.

04

SOLIS® ALS® CONCEALMENT OWB HOLSTER

The Solis® Holster combines the security of ALS® with the release speed and draw simplicity of an open-top design. Solis® is compatible with most compact red dot sights and subcompact lights. The ALS® secures the firearm automatically as it is holstered, yet still allows a fast, natural draw with the swipe of the thumb release as you acquire your shooting grip. Built from durable, weather- and temperature-resistant SafariSeven™ non-marking nylon blend, Solis® will not scratch or mar the finish of your firearm. The holster's open muzzle end design allows for easy debris removal or accommodates threaded barrels.

MILITARY

LIBERATOR® V ADVANCED DUAL COMM HEADSET

The Liberator® V is the standard for advanced communications. This dual communications headset flawlessly integrates advanced communication capabilities with top-tier hearing protection. The Liberator® V headset marks a significant technological advancement beyond its predecessors, earning the trust of elite forces. Proudly designed and meticulously crafted in the USA, it serves as a shining testament to American craftsmanship. Its advanced protection features guarantee unmatched safety in high-risk environments while enhancing situational awareness. The Liberator® V is not just a headset; it's a mission-configurable powerhouse capable of adapting to your unique needs. With a proven history of exceptional performance, it remains the exclusive headset design that empowers users to effortlessly modify audio profiles with a few simple keystrokes directly on the device. When excellence, trustworthiness, and peak performance are essential, the Liberator® V emerges as the unmatched choice.

DELTA 5™ BALLISTIC HELMET

Setting industry standards, the Delta™ line of PROTECH® Tactical helmets is synonymous with ergonomic comfort, superior ballistic performance, and field-tested results. With the addition of the Delta 5, PROTECH continues to expand its product offering, all with the end user in mind. This lightweight ballistic helmet is designed for the needs of the front line and special forces. NIJ 0106.01 compliant, modified to address Type IIIA rounds and velocities, the Delta 5 was developed to give the user a lightweight solution for a ballistic helmet at approximately 30% less weight than traditional ACH-style helmets. Comprised of a polyethylene and aramid composite, the Delta 5 can withstand assault from 17 gr. fragments and type IIIA handgun threats, 9mm and .44 magnum.

TAC AR™ PLATE RACK

The TAC AR™ (Assault Rack) makes upgrading front-line and active shooter protection easy. The TAC AR™ accepts both multi-size hard armor plates in the front and back plate pockets, as well as 6" x 6" mini-side hard armor plates in the outer cummerbund. This plate rack provides the operator with more built-in options, making this sleek carrier a great tool in their arsenal.

MHH KIT

Safariland's 7T5™ ALS® 7360 duty holster was officially chosen by the U.S. Army to outfit their new SIG SAUER sidearm. Provided as a Modular Handgun Holster Kit, the system includes a Safariland® 7360 holster, Single Strap Leg Shroud, the Universal Flex Adapter, and Safariland's QLS Quick Attachment System with multiple mounting options. We are pleased to offer the Model MHHC-Kit1 for our customers. Rugged SafariSeven™ construction and materials, ALS locking security mechanism, and a variety of attachment options to meet the demands of any mission. PATENTED

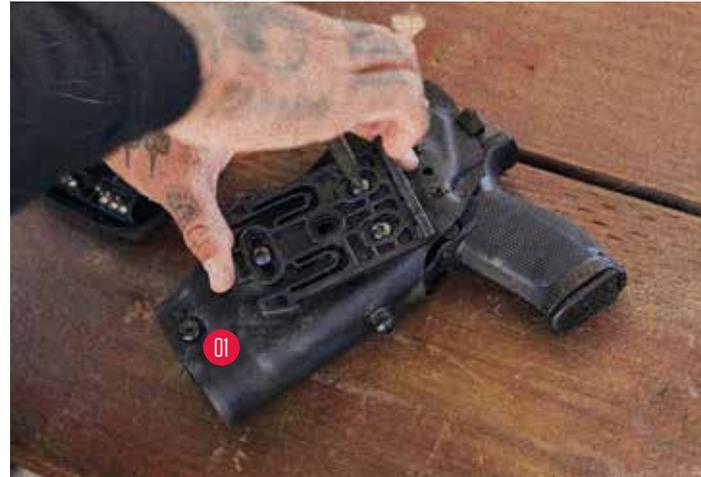

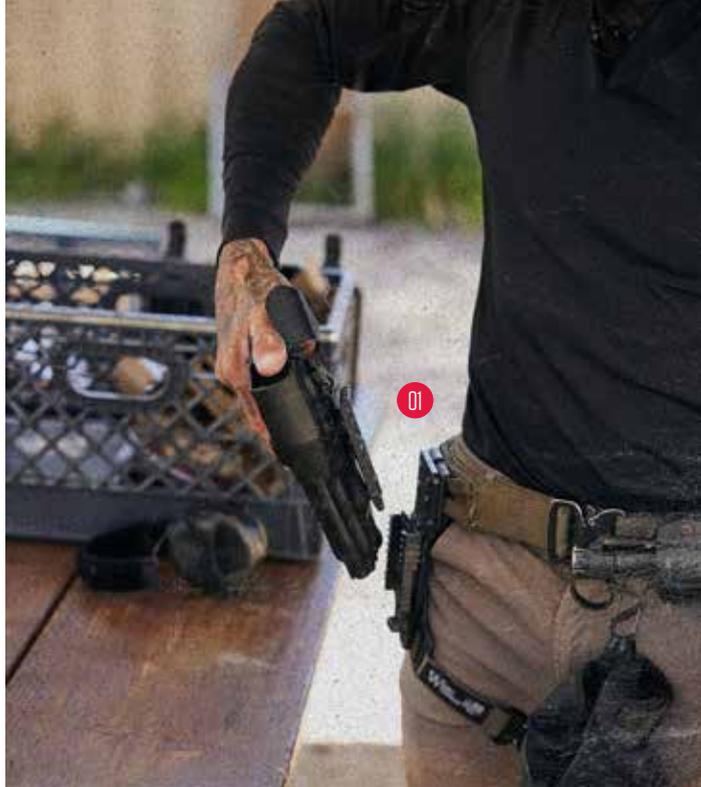

RANGE

LIBERATOR® HP

The Liberator® HP headset is the next generation in electronic hearing protection, offering crisp, clear audio in a durable, scratch-resistant, slim earcup. The Liberator HP provides enhanced hearing protection in all environments, including those with impulse/gunfire noise and high-decibel, constant background audio. Experience advanced sound localization that allows for maximum situational awareness and sound detection. The glass polymer, injection-molded earcups, the same earcup used on the Liberator IV and V headsets, provide extended durability in a slim profile. The included dual fuel option allows speed changes between two AAA batteries or one CR123 battery, or the headset is also available with a rechargeable battery. The headset can be easily converted to behind-the-head or helmet-mount suspension. Liberator HPs designed, engineered, and manufactured in the USA.

01

QUICK LOCKING SYSTEM KIT

The QUICK-KIT includes the QLS 19 Locking Fork and QLS 22 Receiver Plate components. QLS (Quick Locking System) allows for quick gear transfer between attachment points such as a belt loop, tactical leg shroud, or other stable platform. The QLS 19 Locking Fork mounts directly to the back of any Safariland® 2-hole pattern pouch or 3-hole pattern holster. The receiver plate can be attached at different angles according to user preference. Available in Black, FDE Brown, Foliage Green, OD Green or Coyote Brown.

02

LIMITED EDITION HOLSTERS

Safariland continually expands its designs to meet customer needs. The limited-edition patterns offer a variety of camouflage options, from traditional MultiCam to niche-specific designs. The Cordura-wrapped 6354RDS, 6304RDS, and 6354RDSO holsters from Safariland are crafted with precision and feature the renowned Automatic Locking System (ALS®). This innovative technology ensures the firearm remains securely in place, providing peace of mind in high-pressure situations. Additionally, all three models are compatible with red dot sights, enhancing accuracy and target acquisition.

EVERYDAY CARRY

01

INCOG X® IWB HOLSTER

A collaboration between Haley Strategic Partners and Safariland, the 10th-anniversary edition of the Incog IWB holster provides enhanced concealed carry features for users. An ergonomic, mission adaptable, RDS compatible, multi-positional, deep concealment IWB hybrid thermoformed holster. Its distinctive features enable concealed carry for a wide range of handgun fits from various carry positions while allowing for a full firing grip prior to drawing. The design features passive retention and adjustable tension functionality, allowing a fine-tuned holstered firearm fit and draw feel. This evolution of the IncogX features a series of clips that allow more adaptability to the end user while providing the original design intentions of enhanced grip acquisition, concealment, and functionality. The clips open outward and slide down with the holster, naturally locking in place over the belt. An actuated finger tab flexes to open, allowing quick installation or removal from the belt. An improved clip strut design combines functionality with customized concealment shims that can be easily installed or removed without any tools.

02

SCHEMA® IWB HOLSTER

The Schema Inside-the-Waistband holster features a minimalist design for enhanced concealment with smaller footprint compared to traditional inside the waistband holsters. Superior functionality and passive retention provide an exceptional platform for everyday carry for any user.

03

SPECIES® IWB HOLSTER

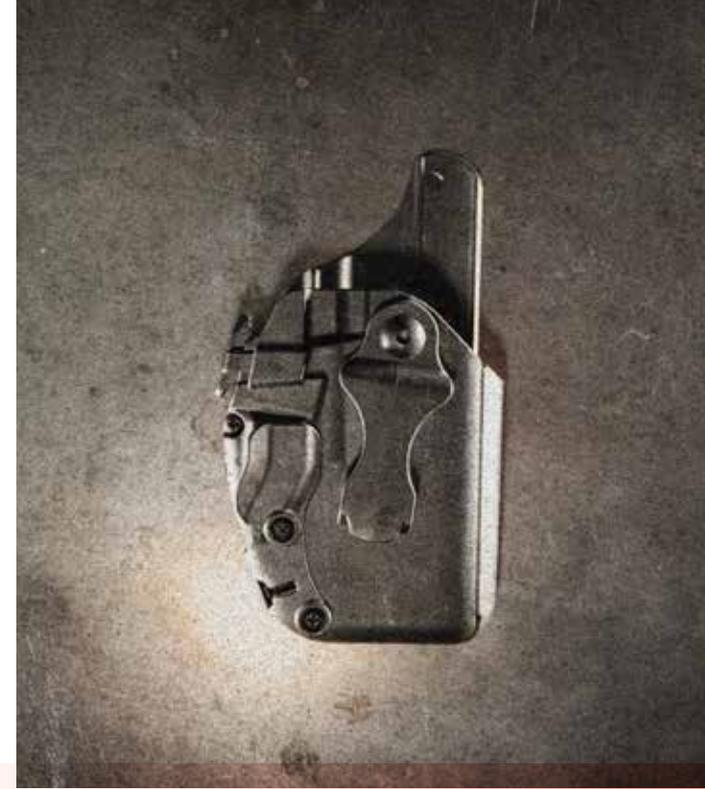

A new species of Boltaron holsters. A minimalist design offers a smaller package versus other IWB holsters. The enhanced material selection and design integration brings Safariland quality materials into this new species of IWB holsters. Dual functionality and tension adjustment allow users to personalize the holster fit, feel, and draw.

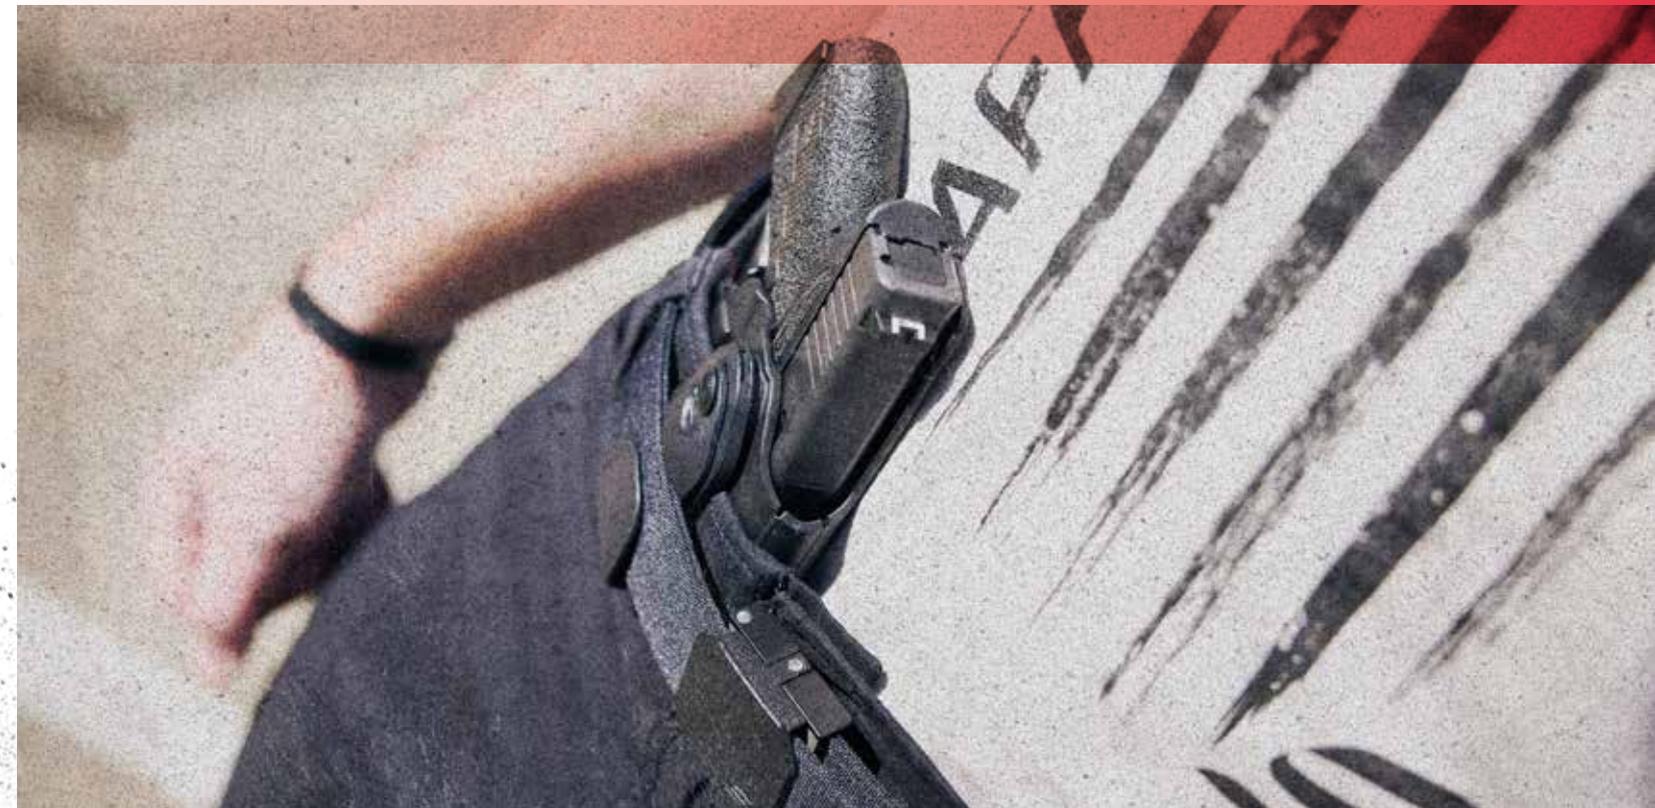

NYLON EDC NEXBELT®

Conceal carry in comfort and style. Originally designed for the firearm industry, Safariland nylon NexBelts can be used in any field that requires attaching tactical and technical equipment and tools to your belt. The compact buckle design and incredibly adjustable latch system provide all the room needed for OWB or IWB carry. The high-density nylon construction increases stiffness and durability, while the water-repellent liner blocks moisture.

575 GLS™ PRO-FIT HOLSTER

The 575 Inside-the-Waistband holster, part of the Pro-Fit family, is designed to fit multiple firearms in a single holster. The addition of the Grip Lock System (GLS™) provides additional security for the firearm once holstered. The low-cut and compact design makes concealment easy while allowing for a quick draw. The 575 provides a fully adjustable cant and multiple belt loop options to create a personalized fit and feel.
