Life Depends on Light

**WEAPON LIGHTS**

**TRUSTED BY LAW ENFORCEMENT**

**USE WHAT THE PROS USE**

Nightstick weapon lights are built to perform under the most stressful conditions—where superior lumens, candela, beam distance, and run-time truly matter. When lives depend on light, Nightstick weapon lights answer the call of duty. We manufacture our weapon-mounted lights using powerful, energy-efficient LEDs and rugged polymer or aircraft-grade aluminum housings. Our lights also feature precision-engineered reflectors and reliable, intuitive switches. Throughout the design and engineering phases, every weapon light is subjected to rigorous recoil testing to ensure 100% functionality and consistency—crucial in those moments when split-second decisions are necessary.

Many of our weapon lights include daylight-visible green lasers, offering enhanced visual confirmation and increased confidence for maximum accuracy and visibility in any lighting condition. We've integrated innovative electronic circuit designs, including programmable strobe and battery-safe modes, and paired them with the latest battery technology to provide flexibility and peace of mind while on duty.

**UNWAVERING COMMITMENT TO QUALITY** | Designed and engineered in Texas, our products are manufactured in dedicated ISO 9001-certified facilities. Each model undergoes stringent quality control inspections by independent third-party inspectors at multiple stages of the manufacturing process. Additional inspections are conducted as products arrive at and depart from our distribution centers. Our commitment to excellence extends beyond manufacturing to our Customer Service experience, where we aim for 100% customer satisfaction—backed by our Limited Lifetime Warranty.
