Hi All (again)

Just after listening to Greer's podcast that I sent out earlier, Ross Coulthart at NewsNation, one of the better UFO reporters, is now saying that this **Saturday at 8 PM** (watch it on the NewsNation website live) he will be showing military whistleblower testimony (with pictures and/or video) from a first hand witness describing a UFO crash retrieval. I don't think that it is the same whistleblower that is coming out with Greer, but the intention is the same - get it out before Trump's inauguration.

In addition to flagging this disclosure event Coulthart continues to explore the recent drone/UAP issues in New Jersey etc and near the end of his video has two technical experts on who have analyzed radar returns from recent UAP's and used other technical data to show that these **UAP's are disturbing local gravity fields** - ie. they are using antigravitic propulsion systems similar to what the Las Vegas Tesla cybertruck suicide bomber disclosed in his "manifesto". There is also a very interesting clip of Trump discussing this issue with some Governors.

The internet is exploding with this stuff right now - I am sure that much is crap and I am only highlighting the sources that I believe are the best.

Quite frankly since Coulthart has now put a specific time down for his source of disclosure to come out and given the way that Greer is now describing more details about the way his whistleblower is acting I am now 90% plus that this historical disclosure will be coming out. The Greer disclosure will be enough to get the ball rolling with a staged program of more indepth disclosure over time. That is why he is doing his own podcast now with Episode 1 out today.

Alan
