Hi All

Ok, I have now broken my commitment not to send out another note unless the evidence met some very high hurdles. This one falls short of that standard but stands out for me as the best credible information yet - it doesn't go as far as many more extreme claims but the credibility behind this guy's story is the best yet.

As you know, I have reviewed a lot of the more in-depth interviews of people who are deep into the UFO issues, especially Steven Greer who has the most "complete" view of the total UFO phenomenon. Greer suffers from a lack of credibility with other UFO observers. Luis Elizondo, who is interviewed in the attached video, does not lack credibility as he is the guy who was working on the official government UAP task force and was responsible for the release of the now famous videos released by the Pentagon in 2017 including the "tic-tac" and "go fast" UAPs.

Greer claims that Elizondo is actually a disinformation specialist who is part of the secret covert group which has been covering up the UFO issue for decades. Greer claims that Elizondo and others are trying to position UFOs as a threat to the world which, of course, means that more money needs to go to the industrial military complex to defend the earth against an alien war. Needless to say a lot of friction between these two men.

Elizondo was in a lot of media shows since 2017 describing how the UAP task force worked. He always refused to answer questions beyond the facts of these videos including speculation about UFO crash retrievals and cover up conspiracies. However, in the last year he has written a book that goes into far more detail including a lot of the speculations. He still has top secret clearance even though he is no longer with the government because he is on call as an advisor to the government. He had to submit a draft of his book to the Pentagon so that he does not disclose anything which still has a top secret classification. It took a year for the government to finally approve the book with various redactions. However there is a lot of very interesting information that he has been able to disclose now.

Although I have been impressed by Greer's knowledge, intellect and "smoothness" he still left me in a lot of doubt (despite seeing his CE5 stuff in California). I have seen several other interviews with Elizondo where I was struck by how credible and genuine he is (Greer is not fully that). This interview below is the longest and best one that I have seen. I urge you to watch the full interview, the first 30 minutes is slow. However it really heats up and I challenge you no matter how skeptical you are to listen to his whole story. I appreciate that most of you can't sit and watch a 3 hr interview, so break it up into 30 min chunks (again the first 30 is slow but necessary to understand who Elizondo is). Even if you don't fully believe him his insight as to how this topic is handled by the government is fascinating.

If you manage to get to the end please drop me a note with your reaction.

All the best,

Alan
