Hi All

This is the week, ie. before January 20, and Greer is again doubling down. The latest interview below on January 10 is with Finnerty on Newsmax. Greer has been claiming for months now that various internet and Youtube search algorithms have been manipulated to remove references to Greer and his UFO news updates. I have noticed this in the past there were days where you could not find his stuff that previously came up in searches only to reappear a week or so later.

I have sent you other recent podcasts done by Greer and one of them a week ago also disappeared. The podcaster, Michael Sandler, complained to Youtube about the deletion of his podcast and got no explanation. So, he redid the podcast and it is back up again.

The Finnerty interview above is the 3rd or 4th interview that Finnerty has done with Greer in the last three weeks and none of these interviews show up in Youtube searches or on Newsmax website searches. These hidden or blocked interviews have been noticed by many. One Youtube host has actually copied the "live" Finnerty interview with Greer, or else we would never be able to see it. Again, Greer is repeating his claim that disclosure is now going to happen this week (my best guess is Wednesday to Friday) and he is providing more details and also talks about the Las Vegas suicide bomber, Livelsberger, who I wrote to you about a few days ago.

Only 10 minutes long

I still doubt that this will happen but hope that it does.

Alan
