Hi All

Yes, I am part of the onslaught, but unless you have ignored various news sources etc for the last week or so you are missing one of the biggest mysteries that we have ever faced. And the media is clearly in a frenzy right now and participating in the onslaught. There is significant new media coverage every few minutes now. And if this “drone” situation is indeed linked to the potential Greer disclosure promise then get ready for a life changing rollercoaster.

I am sending you one of the best discussions about the “drone” situation with one of my favourite UFO reporters, Ross Coulthart, and my favourite whistleblower, Lou Elizondo, and another drone expert.

It is interesting that without mentioning Greer’s name Ross and Lou discuss the possibility that a rogue element of the government and non-government (ie the covert military industrial complex that Greer talks about) may be behind the current “drone” issue.

The details and insight mentioned in this video is very impressive. I urge you to listen to it so you will be ready for what is coming.

Alan
