Hi All

In this update I am taking the easy way out because I am asking you to spend 21 minutes listening to this prominent articulate journalist (originally from Australia) who is becoming increasingly involved in investigating the UFO phenomenon and various disclosure attempts.

Usually these information videos tend to be very long and then I try and summarize information for you. But occasionally I find some that are short, sweet and to the point so I ask you to just watch it.

You will see near the end that he talks about a “catastrophic disclosure” event that could be the way that the key secrets get out. Steven Greer is also very concerned that this type of event could happen and is an advisor to some senior people who are part of the covert secret cover up group who are very guilty about their role in the coverup and want the information to come out for the benefit of humanity. But they are individually trapped under death threats. So a group of them are planning to cause a sudden disclosure event if the legislators are unable to get disclosure done any other way. This could happen within a year if all else fails.
