## Hi All

Ok I may be annoying some of you again. Yes, I did say that I would only email you again if you replied “Yes” to my last email Some of you have, but many have not. For some of you my last email came as a complete surprise. It is also lengthy and included a 45 minute video. I know that most of you have very busy lives and your opportunity to even spend 15 or more minutes watching one thing is limited, especially if you have no desire or reason to watch it. So you get this long crazy email from Alan (you do know me or else you would not have got the email) and you are thinking “Poor Alan, I hope that he can recover from this mental illness”. I don’t think that I can change that perception if you have it, unless, unless, .... you watch the video below!

Some of you do have the full intention to read my email and watch the video but haven’t had the time yet so you also have not been able to send me a “Yes” yet. This is not “urgent”, but it is extremely important. We all have important but not urgent events in our life and one of the most important skill sets that a person can develop is

important skill sets that a person can develop is their ability to master the use of your time so that you do not constantly defer non urgent but important matters. End of lecture.

*Since we know each other, as a personal favour to me I am pleading with you to watch the video below (1 hour), **BUT ONLY** after you have watched the video (45 minutes) that I sent in my last email, also attached below for your convenience. If you don't watch the first video then don't bother watching the Greer video because the context of what Greer talks about requires knowledge of the first video.*

The Steven Greer Podcast 3 video below is the best and most important video that Greer has ever done and the best. Why do I say this?

Many of you who are new to these emails probably know nothing about Steven Greer. At the risk of duplicating information about Greer that I have sent to some of you here is a bit of his history:

- . he had childhood experiences with UFOs
- . he became a meditation teacher trained by monks in Tibet
- . he then became an emergency room doctor

for the bulk of his career

- . during his meditation sessions he has had continual telepathic and physical contact with ETs and their vehicles
- . in a near death experience his consciousness was exposed to the ET's and he was given fundamental knowledge about the Universe and the many peaceful advanced civilizations that exist
- . in collaboration with the ETs he developed a CE5 protocol to peacefully use meditative techniques to ask ETs to appear in any form they choose - in UFOs - they manifest in very many different ways - or in body form
- . in the 1990's and to today he has become the number one UFO researcher in the world and has compiled the most evidence and witness testimony than anybody else
- . in the 1990's he claims that he was offered a huge bribe to stop his work and he refused
- . he has been under constant death threats (I have talked to the leader of his security team)
- . he has held two groundbreaking Washington Press Club Press conferences (2001 and 2023) with public whistleblowers
- . his UFO disclosure allegations are the most extreme of anybody else in the UFO field - around 2012 the UFO community (including

- around 2012 the UFO community (including me) abandoned him and he was ostracized
- . the major media and also two of the biggest podcasters (Joe Rogan and Shawn Ryan) will not talk to him now
  - . he is very egotistic, relentless, proudly rebellious, brilliant and can link together information from many directions and tell a very cohesive story
  - . But, his ego is abrasive, he doesn't suffer fools, he claims that most of the UFO community knowingly or naively are part of the "disinformation" campaign that is presenting a false aspect to the current disclosure that is happening

Too much information? Have I turned you off Greer? I want to be transparent about him, because after watching the Jake Barber whistleblower evidence in the last video and his new podcast below my personal opinion about Greer has shifted - I still don't believe his most extreme allegations but now most of his story now rings true.

You should also know that I have spent over 50 hours of personal time with Greer (in addition to a 100 or more hours with his online information). I

started to follow Greer again in 2023 due to his new press conference and the US hearings about UFO's. In March 2024 I spent 25 hours with him exploring the details of his massive evidence archive, free and online now. It is amazing. As a major test of his credibility, Janet and I went to California last July (120F and fires around us then) and spent another 25 hours with Greer and 500 other crazy people just like me to experience first hand his CE5 contact protocol to reach out to ET's. If you wish I can send you a previous email (yes, another long one) to describe in more detail what happened. In short, my experience there combined with other information has convinced me that it is real (and so does the whistleblower Jake Barber who demonstrated how it works in the first video).

Sorry for the long lead in but context is very important.

Please watch these videos and give me feedback and say "Yes" if you want more **(I will give you 2 weeks before I drop you from future emails).**

Thank you

Alan
