

Hi All

By now you all know that I am a very biased in my views about UFO's and aliens. Yes, I want it to be true that both exist. It would become the greatest story in the evolution of mankind. Maybe at an impact level similar to the story of God and Jesus or other religious entities. Some of you might say that I am turning the belief of aliens into a religion! Maybe that is what I have done.

As I have stated before I do believe that there are many intelligent alien civilizations in the universe. I am 100% confident in that statement. It is a no brainer in my opinion. However, I acknowledge that some of you do not agree with that so anything else that I say beyond that will not make any difference.

My belief that there are UFO's and aliens in our possession is not 100%. I think it is 50% plus now. I was probably only at 10% a few years ago. But there has been so much discovered and publicly acknowledged in the last few years that for me the probability is increasing. If I am wrong

at least I have an interesting hobby as a science geek!

I have read and heard about many objections to the possibility that we have UFO's and aliens in our possession. For me the three most significant objections are:

1. If aliens do exist it would be impossible for aliens to have visited Earth because of the huge distances involved and that the limiting factor imposed by speed of light means that it would take millions and billions of years for anybody to get here.
2. How could a conspiracy by the "military industrial complex" exist since the 1940's and successfully keep secret the reality of UFO's and aliens? Surely somebody would have come forward by now with proof of UFO vehicles and alien bodies.
3. Given the existence of cameras, and now phones, that everybody has why do we not have definitive photographic evidence, or other evidence of UFO's and aliens from the general public.

Over the next few updates I will try and deal with

Over the next few updates I will try and deal with each of these objections.

In the meantime, please send me any other questions you think are more important than the three that I have listed above.

Until next time,

Alan
