Hi All

As I mentioned in my last update, in March I attended a virtual “Deep Disclosure” seminar with Dr Steven Greer. It consisted of Greer spending 25 hours with over 250 participants disclosing details of an evidence archive that he has been accumulating for over 34 years. The evidence consists of personal witness testimony (around 800), many documents from government archives, many letters with political and governmental leaders, advanced scientific knowledge and suppressed patents, photographs and videos, and many personal anecdotal stories. This evidence archive has already been given to the Senate and House Committees that are investigating UAP’s and allegations of extensive decades long secrecy. He plans to host the evidence archive on a web site when it is finished - a few months from now. Many of the documents and interviews are already posted on his web site: [drstevengreer.com](http://drstevengreer.com)

I have previously mentioned that Greer has the most extreme views on the overall UFO phenomenon. I followed him closely in the 1990’s and up to around 2010. But as some of his allegations became more extreme I started following other Ufologists but also kept an eye on what Greer was doing. I expected that this seminar would be informative about a lot of non controversial (is there any?) information but that his extreme views would ultimately turn me off him.

My reactions to the seminar include:

- I am overwhelmed.
- I am disturbed.
- I am impressed by the nature and power of his evidence.
- I am amazed at how he can weave together all of his evidence and connect all the dots to show how corroboration comes from many directions

from many directions.

- I am amazed by how he articulates the more extreme claims.
- I still find it hard to believe some of his extreme views and want to see more evidence in his archive first hand - we could only skim parts of his archive with him.
- I have seen a lot of his evidence in “snippets” before but to see it all weaved together over 25 intense hours gives you a completely different feel about it.
- For the time being I am going to take the approach that he is wrong about his extreme views and try to find something to refute it, other than saying “that’s impossible”.

Greer made the point that the UFO issue is NOT about the fact that UFO’s and aliens exist, but that we have man made UFO’s and are doing the abductions and other staged events to create fear about an alien invasion and their danger to humanity. The fear of alien invasions and national security threats becomes the fuel for trillions of dollars flowing into the military industrial complex. The lies that the secret military industrial complex make about aliens include:

- They are a national security threat. No they are not. They are peaceful advanced spiritual civilizations.
- We don’t know what or who they are. Yes we do know who they are - up to 60 alien races have been identified.
- We don’t know how UFO’s work. Yes we do know about electro gravitic propulsion and zero point free energy systems.
- We don’t have this technology. Yes we do. In 1953 we mastered electro gravitic propulsion (a government document shows this) and have been making man made UFO’s for decades now.

One of Greer’s extreme claims involves his ability to ask aliens to visit him - called CE5 or close encounters of the fifth kind (remember the famous movie Close Encounters of the Third Kind) whereby we initiate alien contact. Greer’s personal story illustrates why he thinks that he can do this:

- He saw a UFO close up when he was 8.
- He had a near death experience in his late teens where he saw the whole universe including many advanced alien civilizations as well as many spiritual symbols including the presence of a “God”.
- He has had many episodes of “astral projection” when sleeping and toured the universe.
- He went to Tibet to learn about meditation and become a master teacher in meditation (I share his interest in meditation as I have been doing it since my 20’s - I can’t astral project but could take lessons but too afraid of trying).
- He found that as he meditated and focused peaceful intention towards aliens that he saw evidence of nearby UFO’s either in solid form or in a transitional distorted light images.
- He then became a medical doctor and ran an emergency department well into the 1990’s.
- He is 68 now and has spent 34 years deeply involved in the UFO issue, not just trying to uncover the truth of UFO crashes and aliens, but also how to spiritually connect with them.
- In 1992 he held his first publicized CE 5 event in Florida and found that many people who worked in the aerospace industry, department of defence, CIA and Pentagon had visited his web site for the event (by tracing IP addresses).
- After the event he was approached by one of the leaders of the covert secret group involved in covering up the UFO/alien secrets and was told that they were surprised and impressed by his ability to communicate directly with aliens through the non local quantum field of consciousness - they had also discovered this and were alarmed that Greer could do it too.
- He was offered \$2 billion to join them in a senior leadership role. He said no. They went after his wife and he said no again. He wanted no part in a working with what he calls “psychopaths”.
- Ever since that time they have watched Greer closely. He was becoming famous now for his beliefs and this fame has helped him to avoid assassination although attempts have been made, a member of his team was killed. He travels with armed

security guards.

- CE5 (see link below) events have been held all over the world and after a search about them I found far more attendees at his events that say it is true versus not true.

Do I believe all of the above. No. But am open to the possibility.

I want to try and disprove some of his extreme views. The only one that I can personally check out for real is his CE5 claims. So Janet and I are going to join Steven Greer in July in California and participate in a CE5 three day seminar which will include two nights of joining a meditation circle to summon UFO's and aliens. If this is a hoax I will be the first to say so as this event is not cheap.

So you can look forward to the July issue where I will either amaze you or I will crawl back into a rabbit hole and be gone!

In the next few updates I will explore more about Greer's evidence about other parts of his story.

An email will follow with information about what Janet and I will be getting involved with.

All the best,

Alan
