## To My Secret Disclosure Group

My favourite hobby, UFO's, is really heating up now.

The biggest change has been a UFO/UAP bill adopted by Congress which does the following:

- asks the Pentagon to monitor and report back on UFO's
- protects whistleblowers who know the secrets to come forward and be protected from NDA's, job/pension benefits (it can't protect them from death however!)
- gives companies who possess UFO material to come forward within 6 months before being prosecuted
- and more

I would highly recommend the video below which is about a military marine whistleblower (caution - armed forces language) who has come forward and already been interviewed by the Senate Committee. The content is not about ET UFO'S but manmade UFO's based on reverse engineering of ET UFO's. It also gives insight into how a secret dark group operates and protects info from coming out.

The marine refers to Steven Greer who has been at the forefront of UFO disclosure since the 1990's. If you like the video below then you should watch the June 12 Washington Press Club video by Greer (which gives the whole story).

I will admit that all of the other mainstream Ufologists distance themselves from Greer because his story is very extreme but as more witnesses come forward he is more right than wrong. The late Paul Helyer who was Canada's defence minister was quite active about UFO disclosure and worked with Greer. He has interviewed 750 whistleblowers since the 1990's, only 150 allow their names to be disclosed for obvious reasons. A few of the whistleblowers do sound crazy but many are like the marine in this video. If you think that he is making this up then you can ignore the rest of my email! You really do need to watch the whole video as many questions will come up that get answered by the end.

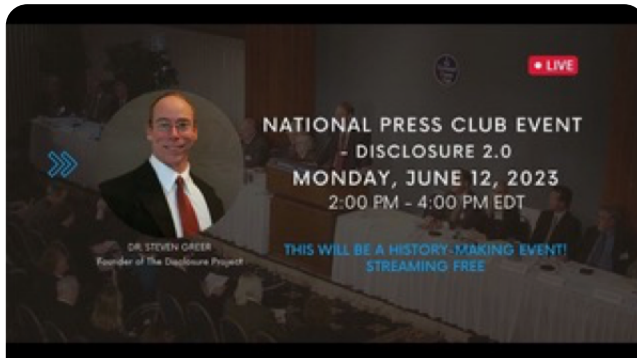

This one should get your attention:

Here are other links to watch about this - they are long but if you think that there could be something to it good to see. If all fiction then it is at least very entertaining!

I would be happy to answer any of your questions - ok but, what about .... etc.

Crazily yours,

Alan
