

Hi All

In an effort to communicate some specific issues I may be sending out more frequent updates like this.

Speed of Light Revisited

In my last update in discussing the ability to travel faster than the speed of light I mentioned quantum entanglement as a possible example of this ability. I have done further research into this and I am satisfied that quantum entanglement is not really a valid example of communication at faster than light speed. However, that does not mean that as new laws of physics are discovered that travelling at faster than the speed of light will not be possible. Based on our current understanding of physics (which again is thousands to billions of years behind advanced civilizations) travelling at faster than the speed of light implies time travel back in time and the risk of causality issues such as killing your grandfather so that you are never born. There is a theory that at least some aliens are really future humans who have come back in time to visit us

humans who have come back in time to visit us, study the history of mankind etc. I have read a book full of scientific and biological data that supports this concept. There is also a view that given that string theory can also imply that there are multiple parallel universes then time travel back in time may occur in a parallel universe so that the risk of causality in the original universe is not a factor.

Why is the ability to travel faster than the speed of light so important? First, most of the population agrees that there must be (not just maybe) other advanced life throughout the universe. However that does not mean that any advanced life has actually ever visited Earth. Given the enormous distances in the universe unless advanced beings can live for thousands or millions of years, and access infinite energy sources, if they can only travel at light speed (which is impossible because mass becomes infinite and energy needs go to infinity) then they could not have ever visited the Earth. As an indirect proof of faster than light travel, given the extensive historical evidence that they have visited the Earth means that they do have a way to travel faster than the speed of light.

DR GREER ANNOUNCES FEDERAL UAP WHISTLEBLOWER PROTECTION AVAILABLE NOW

"Dr. Greer has been in touch with law enforcement for many months now working out ways that significant whistleblowers on the UFO/UAP / New Energy issue can be protected. That process began June 20, 2024 and is now operational.

A special access project (SAP) is in place which can provide security for whistleblowers. Once set up for the particular whistleblower, it will be able to monitor communications with the whistleblower and, if threatened, will be set up in such a way as to identify, capture and prosecute those making the threats."

As a reminder, Steven Greer has met with over 800 whistleblowers starting in the 1990's. There stories are documented in writing and in videos. I have a complete list of the all of the whistleblowers (with a synopsis of what they can testify to) from Dr Greer's evidence archive that anybody can now access on the internet. Only 150 of them have their names disclosed. The

others are in fear for their lives (and family lives) due to many documented assassination events (called “wetworks” inside the group behind the secrecy). Many of these whistleblowers currently work inside the secret group but want out - they are trapped.

All the best,

Alan
