Safety Strap Kit 1 SET	Wall Anchor 1 PC	Bracket 2 PCS	Short Screw 1 PC	Long Screw 1 PC	Safety Wall Strap 1 PC

## SAFETY WALL STRAP INSTALLATION

Note: It is highly recommended to install this safety strap kit to prevent tipping, damage and/or injury.

1. Attach the 1st bracket (B) to the unit with a short screw (C). Bracket should be centered along a top edge of the unit, parallel to the wall. Position the bracket as high as possible on the unit, but without interfering with the function of the unit.
2. Place the unit against the wall where it is going to be. Note the location of the 1st bracket (B) on the unit, and mark the wall near the bracket where you want to place the 2nd bracket (B). To attach the 2nd bracket to the wall, drill a 1 1/32" hole into the wall where you want to secure the unit. Tap wall anchor (A) into the hole. Using long screw (D), secure the 2nd bracket (B) to the wall.
3. Insert the safety wall strap (E) through both bracket (B) and tighten. If the strap is not long enough to pass through both brackets and tighten, you will have to reposition the unit, or the wall anchor so it reaches.

Note: This item is not intended for clothing storage use.
