

# Surveying Capabilities

## GENERAL SURVEYS

Full survey services covering boundaries, lots, mortgage locations, topographic needs, ALTA/ASCM requirements, legal descriptions, specialized dike and tank work, GPS control networks, GIS mapping, and railroad routes.

## LAND USE

Services include airport runway layout, highway and utility staking, slope staking, landfill checks, RTK GPS staking, route surveys, and full construction staking.

## CERTIFICATIONS / PLATS

Services include right-of-way plats, as-built certifications, annexation plats, flood elevation certificates, residential and commercial subdivision plats, and condominium plats.

## ADDITIONAL SERVICES

We provide route and refinance surveys, boundary and subdivision work, layout and volume measurements, horizontal and vertical control, support for subsurface tank projects, tree location services, GPS surveys, asset inventories, road mapping, monitoring well and bore hole locations, and latitude-and-longitude determination.
