

THE PROJECT CONNEXION

Project Consultancy Company

Providing Consultancy Services,
Specialist Resources and Project Systems.
Offering the “X” factor solution to our Clients.

Who We Are

The company was founded in 2022 by Cornelius de Jonge who has over 25 years of experience in project environments. Ranging from large-scale engineering, construction and unique software development projects. Our objective is to provide consultants, resources and systems that will bring the X factor solutions for Clients. Our Vision is the set a new World standard when it comes to establishing an optimum project execution strategy.

Projects fail for a variety of reasons that include amongst others, a weak business case or a poor execution strategy. The associated lack of proper Stakeholder engagement and ineffective communication is a common risk factor. Quality systems are in most cases developed to merely "satisfy the system" and are usually overcomplicated. There are a few secrets we can share to unlock and improve organisational throughput.

Key Focus Areas

- Consultation at Project Director level is provided to optimise project delivery and help “rescue” projects encountering complications. We offer a simplified but effective upfront audit. By doing this we assess the probability of a project’s success and assist in establishing the key control measures required by Project Directors.
- Supplying Project Control specialist services and software.
We offer pre-configured Sciforma Portfolio Management Systems on a SaaS basis. We can also assist with the implementation of similar platforms.
- Training and development of resources in Project Management and Project Software.

Success Matters!
