## **WORLD'S FASTEST ELECTRIC SHEARS**

Our high speed Minishere works like a pair of hand shears...but faster. For clean cutting of all types of material, single and multiple plies up to 5/16" (8mm).

The unique shearing action of the Minishere's six-sided blade is ideal for cutting low lays of tough material like Cordura and Kevlar, or delicates like the latest microfibers. The Minishere won't fuse synthetics or pull on light fabrics.

### **ERGONOMICALLY DESIGNED**

The comfortable handle and easy on/off microswitch reduce strain and fatigue on the operator's wrist.

### **SPECIAL FEATURES**

**3-in-1 Cutting Guide** — the baseplate converts easily to a special guide for slitting and trimming plastics or knitted fabrics.

**Recessed Sharpener** — permits unobstructed view of cutting line.

**Built-in Lubricator** — for cutting special materials like vinyl or coated fabrics.

**Shock Protection** — the Minishere is double insulated for greater operator safety.

### **LONG HANDLE MINISHERE**

For cutting wide spreads, we have mounted the Minishere on an extension handle with the starting switch located just below the grip for easy on/off. Overall length 32".

### **AIR MINISHERE**

Pneumatic motor produces three times the power of the electric model. Requires only 90 psi for full power.
