

TOLLING SERVICES

Get the advantage of Star's toll processing services and rely on 35 years of experience in recycling and polymer processing. Put Star to work for you!

COMPOUNDING

At Star, incremental quality checks and testing is built into our internal process because ensuring quality is the most important aspect of serving you. Star has been in business 35 years as a custom compounder and processor, and we put that

POLYMER BLENDING

Ensure that all of your material is consistently blended. Star's blenders are all stainless steel and food-grade compatible.

OPTICAL SORTING

You can take advantage of our optical sorting services. Using advanced electronic sensors and cameras, our sorting system separates the good product from the bad.

DESICCANT DRYING

You can rest assured that your materials are free of moisture and ready to be processed. We can dry up to truckload quantities for you.

METAL DETECTION

You can rely on the fact that the last step in all of our manufacturing processes is to examine the material and remove any metals. We offer both ferrous and non-ferrous detection options.

REPACKAGING

You can take advantage of Star's many repackaging options, available in any volume, from 25 kg bags up to railcars..

MATERIAL ID & ANALYSIS

You can identify material types, stability, contamination and specialty additives. You can be confident in our in-house analytical labs, assuring quality and speed-to-market.

SCREENING

To separate particles, by their size, you can rely on Star's industrial screening services. The choice of screen design depends on the application requirements and the properties of the materials being processed.

BAGGING

Star can bag your products so you can focus on the other aspects of the job. A variety of bag sizes are available, 25 kg bags and up.

STORAGE

You can rely on storing your materials with Star Plastics. We can keep materials safely until you're ready to process them.

GRANULATION

We can take your plastics waste in any form and reduce it in size so that it can be put back into your manufacturing process.
