# Izumi Omori

Izumi's work features the magic of growth, the miracle of flowers and the life of the trees and hedgerows, alive with bees & butterflies. Her paintings shimmer with light and living energy, capturing transitory moments of many-layered life and growth in layers of paint & texture.

They have both strength and delicacy; a blending of Cornish elements with Japanese style and sensitivity. Izumi's paintings grow into existence by a process of building up & paring down, allowing the paint to speak & develop as it needs.

Some of my prints are now available on fabric, such as scarves! Please visit:
