LOVE THROUGH RELATIONSHIPS

In the Venus Sequence, we follow the path of **Love**.

This journey guides you to discover freedom and lasting love through your relationships, through understanding and releasing old negative patterns and fully opening your heart.

We use our daily lives and our relationships as the fuel of our spiritual transformation.

WE LEARN THROUGH RELATIONSHIPS

Experiencing struggle is both the challenge and the opportunity within relationships.

In the Venus Sequence, we look in depth at our patterns of suffering. Through our relationships, we can see these patterns most clearly.

Based on the same structure as our genetic code, suffering can be distilled down to six essential themes. The Venus Sequence is one of the simplest techniques for revealing the deepest issues in our lives.

IT IS SUPER POWERFUL!

WHAT IS SUFFERING?

This very human trait of wanting to free from pain is totally understandable.

Few people have discovered the true secret of suffering:

Suffering is a Doorway to Grace

Our pain is always trying to tell us something important, and if we can summon the courage to lean into the pain and listen to its message, then we will always discover its hidden gift.

Often our culture doesn't teach us that there is a gift in our physical and emotional suffering.

BRIEF CONTEMPLATION

Step 1: Remember your Intention: the issue, challenge or area in your life you wanted to improve in someway

Step 2: Notice - has it shifted in any way over the last 3 months?

Step 3: Write down what changed for the better.

CELEBRATION

Step 4: Internally “Celebrate” any positive changes with 1 or more of the 5 subtle senses (thoughts, internal sensations, images, knowing, nourishment)

Step 5: Let’s celebrate together...

WHAT IS THE JOURNEY?

The Venus Sequence is a journey right into the heart of human suffering.

This journey through your 6 spheres helps you discover conditioned patterns locked in your DNA.

The process for healing those patterns is through the act of observation and contemplation.

...then BRAIN BALANCING to tap in the learning!

CONTEMPLATION TIME

Grab your journal/paper & pen or OneNote or another app on your phone

1. Remind yourself of your intention
2. Choose one of your 6 spheres to contemplate (Purpose, Attraction, EQ, IQ, SQ, Core Wound)
3. “Pause” and breathe in the oil scent of that sphere
4. Breathe into your heart and then down into your body.

CONTEMPLATION TIME

5. As you embrace this sphere, what subtle senses (thoughts, internal sensations, images, knowing, nourishment) emerge?
6. Look from the heart and write what bubbles up to the mind
7. What, if any, gifts emerge as a result of your contemplation?

COMMUNITY TIME

Share what bubbled up...

WHAT HAPPENS NEXT?

**One thing you may notice:
your relationships will keep
reflecting to you exactly how
far your understanding is
progressing.**

**Feel free to use this wisdom
as you feel drawn to using it.**

**It is your journey, so you
should follow your heart as
you drift, dive, plummet,
rise, and immerse yourself
in the living waters of the
Venus Stream.**
