Cat Coode

Professional Speaker, Data Privacy Expert, Woman in Tech

ABOUT CAT

An engineer and software architect, Cat has spent two decades working in roles from software developer to senior management. In 2013, Cat recognized the need for people to better understand the importance of their digital data and how to keep it safe. Combining her love for teaching and her background in tech, Cat launched Binary Tattoo to help empower people with this knowledge so they can have a safe and positive online experience. In addition to speaking, Cat specializes in guiding companies through their global privacy regulation compliance, backed by a certification in Canadian Privacy Law from the International Association of Privacy Professionals.

TOPICS OFFERED
