

# MK677 Ibutamoren

MK-677 is a hormone secretion compound that stimulates the pituitary gland to increase the production of human growth hormone. Ibutamoren is a long-acting, orally active, selective, and non-peptide agonist of the ghrelin receptor and a growth hormone secretagogue, imitating the growth hormone (GH)-stimulating action of the endogenous hormone ghrelin

- Increase IGF-1 Levels in as little as two weeks.
- longer REM sleep and shorter sleep latency.
- Increase fat-free muscle mass.
- Decrease body fat percentage.
- Stronger bones.
- Improved endurance
- Increase nitrogen levels in the body.
- Reversal of nitrogen wasting.
