

BPC-157

Body Protection Compound

BPC 157, composed of 15 amino acids, is a partial sequence of body protection compound (BPC) that is discovered in and isolated from the human gastric juice. Experimentally it has been demonstrated to accelerate the healing of many different wounds, including tendon-to-bone healing and superior healing of damaged ligaments. Also, BPC 157 seems to protect organs and to prevent ulcers of the stomach. This peptide is also shown to decrease pain in damaged areas. Those who suffer from discomfort due to muscle sprains, tears, and damage may benefit from treatment with this peptide. It can also help aid skin burns to heal at a faster rate and increase blood flow to damaged tissues.

TENDONS

- Tendon healing.
- Decrease pain.
- Increase collagen synthesis.
- Quicker recovery times post-injury.

LIGAMENTS

- Wound and bone healing.
- Decrease inflammation.
- Intestinal issues.
- Protects the heart.

MUSCLES

- Reverse opioid tolerance
- Enhance GABA neurotransmission.
