Participation in all physical activities involves certain inherent risks and regardless of the care taken, it is impossible to ensure the safety of the participant. Dance is an activity that requires the development of coordination, agility, and a high level of cardiovascular and muscular fitness. A variety of injuries can occur to a dance participant:

These, and other injuries, sometimes occur in dance as a result of hazards or accidents such as slips, being struck by another individual, colliding with another individual, colliding with the wall or another object, fall from being lifted in a stunt or prop, falling to the floor, or excessive stress placed on the cardiovascular system.
