

ARCH & BROW STUDIO

CONSENT & RELEASE AGREEMENT

This form is designed to give information needed to make an informed choice of whether or not to undergo a 3D Eyebrow, Microblading, Semi-Permanent makeup application. If you have any questions please do not hesitate to ask.

Although 3D Eyebrow Microblading is effective in most cases, no guarantee can be made that a specific client will benefit from the procedure.

This is the process of inserting pigment into the basal layer of the epidermis. It is a form of tattooing, though semi-permanent.

All instruments that enter the skin or come in contact with body fluids are disposable, and disposed of after use. Cross contamination guidelines are strictly adhered to and followed.

Generally, the results are excellent, however a perfect result is not a realistic expectation. In it usual and advised to expect a touch-up after healing is completed.

Initially the color will appear more vibrant or darker compared to the end result. Usually within 5-7 days the color will fade 40-50%, soften and look more natural. The pigment is semi-permanent pigment and will fade over time.

Additional Touch Up or Color Boost applications are likely needed within 6 months to 2 years to maintain.
