

ProGen PRP™

PLATELET CONCENTRATION SYSTEM

ALL NATURAL. ALL FOR YOU.

Your Guide To Platelet-Rich Plasma

WHAT IS PLATELET-RICH PLASMA?

Your blood is made up of four main components: red blood cells, white blood cells, platelets, and plasma. Platelet-Rich Plasma is concentrated component from your own blood that contains nutrient-rich cells and protein growth factors.

HOW IS PLATELET-RICH PLASMA PREPARED?

Platelet-Rich Plasma is produced when a small amount of blood is drawn and placed into a sterile, disposable container and then, spun to separate the platelets from your blood sample, resulting in a platelet-rich plasma.

IS PLATELET-RICH PLASMA SAFE?

Platelet-Rich Plasma is safe because it comes from your own blood, therefore, there is minimal risk for allergic or immune reaction. Side effects or complications with Platelet-Rich Plasma are extremely rare and must be conducted by a licensed and trained medical professional. Consult your physician for more information.

SMALL BLOOD DRAW

Progen PRP™ system is simple and requires only a small amount of blood from you.

SAFETY

Our ProGen PRP™ system maintains a 510(k) clearance from the FDA.

STERILITY

All of our kits are individually packaged and ready to provide you with a safe and sterile procedure.

SKIN SCIENCE FOR LIFE

INTENDED USE: The ProGen™ PC Kit is indicated for the rapid preparation of autologous Platelet-Rich Plasma from a small sample of blood at the patient's point of care. The Platelet-Rich Plasma is mixed with autograft/or allograft bone prior to the application to a bony defect for improving handling characteristics of the graft.
See Instructions for Use for important safety information and a complete list of Cautions.
