Unified Communications & Video

Welcome to Your New Work Environment

More Effective Collaboration

Admins,

The refresh of building 10 is complete, and we would like to take this opportunity to tell you about your new, improved environment.

Your new workspace will provide improved productivity benefits such as:

- A consistent, intuitive experience across devices
- More effective face-to-face meetings
- Increased flexibility within your environment

You will find that your newly configured office space is equipped with multiple video endpoints, as well as a standard IP phone. These devices work together seamlessly, allowing you the flexibility to utilize your workspace based on your preference and needs, as well as those of the executive you support.

For assistance on how to use the devices, we will provide an in-person, high-touch training and on-site support.

To learn more about how your new devices work together, and for other additional information, visit **GetVideo.Cisco.com**.

Regards,

Cisco IT Unified Communications & Video

Connect everything. Innovate everywhere. Benefit everyone.
