Subject: RE: Work Party

My desk top computer is down, so I did not send out a report. We had a very productive day. Those present were Dan Stenger, Ron Steckel, Jeff Dennis, Doc Moyer, Marlin Evans and myself. Jeff installed shelves in the office. Dan fixed some spindles on the Fire escape, and assisted Steck with repairing the holes in the driveway. We used 12 1/2 bags of blacktop. This is getting expensive each spring @ \$10 a bag. I'm going to talk with McKenzie regarding repaving. Steck also cut down the tall weeds on the far side of the driveway. He used his son's gas powered tamper to pack down the new blacktop. He also caulked around the base of the shower where we think there is a leak. Steck also pulled some obvious weeds around the house. I installed the repaired broken window in the kitchen bedroom, fixed a shade in the small bathroom up stairs, fabricated a leg for the slop sink in the powder room and hooked it up. It's working well. I also installed a threshold between the new floor in the powder room and the kitchen. Doc did a fantastic job cleaning the entire downstairs. He was there most of the day. Marlin helped me to make the leg for the slop sink. You can see we put a dent in some jobs, but many more to address and complete. We accomplished so much in the 6 hours of work, with very few hands, but we had fun. Went to Rudy's for about 1 hour afterwards, only Steck and I. What a great job these guys did.

Next work day will be within the first two weeks of June. Stay tuned.
