

Sigma Pi – Beta Psi

Summer 2021

With the upcoming semester starting in 2 weeks the active brothers have been hard at working preparing events and activities to grow the chapter. Due to Covid-19 it has been over a year since the undergraduate students have been in any campus facility. However, this inconvenience did not hinder the active brothers from excelling academically, socially, or physically.

Former Sage, and current Vice President Jared Munoz has received the Tony Messenlehner two semesters in a row. Cementing his role as being one of the best leaders the Beta-Psi Chapter has seen in years. His tireless work and tremendous leadership skills has helped keep this chapter thriving since his initiation in the Spring Semester of 2019. Serving on the Executive Board the following semester he has maintained his role as being one of the most involved brothers the chapter has seen in years.

However, this chapter is filled with outstanding men who continue to impress their peers showing their dedication to the Beta-Psi Chapter such as past Secretary Frank Sain. Being initiated his freshman year in the Spring of 2018 he has been a huge part in the survival of our beloved house on Smith Street. Through his past actions and positive moral, he was awarded the John Gudikunst award this year. Formally accepting the scholarship during the June 11th Picnic at 12 Smith Street. This picnic gave him the opportunity to meet alumni who had not been able to make an appearance since homecoming a few years back. His presence helped to show some weary alumni that the Beta-Psi chapter is improving tremendously.

While last week Pierre Liciaga, traveled to Florida and had the honor of representing Puerto Rico in the North American Powerlifting Federation (NAPF) Pan Am powerlifting competition coming back with not one but two silver medals. One in the university division and the second medal in the open division.

During the summer Mike Perusso has spent countless days renovating both of the bathrooms on the second floor. Tearing up the old laminate that had been damaged by water. He installed a new floor and beautiful floor tiles to the entire bathroom. While adding a new countertop to the larger bathroom and giving them both a new coat of paint. He alongside Jeff Bruno and Howard Evans have continued to help improve the living quarters at the house.
