

TRVWRF Multipurpose Building Temecula, CA

Owner

Eastern Municipal Water District
Perris, CA

Architect

Gillis + Panichapan Architects
Costa Mesa, CA

This project consisted of converting what was originally a chlorine facility into a multipurpose and workout facility. The entire facility was gutted and the damaged roof structure was removed and a new I-joist roof structure created. Entirely new MEP systems were installed while keeping existing MCC in operation. Existing Concrete floors were overlaid, ground and polished.
