LIBERTAS - Connect, Learn, Grow Together

Rex Jannus

Founder & Visionary

The Urgency

Current Threat:

We have become a bitterly divided nation desperately in need of healing and if we fail to do so we face an existential crisis as a nation.

Motivation:

People come together naturally along lines on common interest and desires but lack the tools to do so while being able to build an avatar and go on quests to gain XP and earn cool badges and titles.
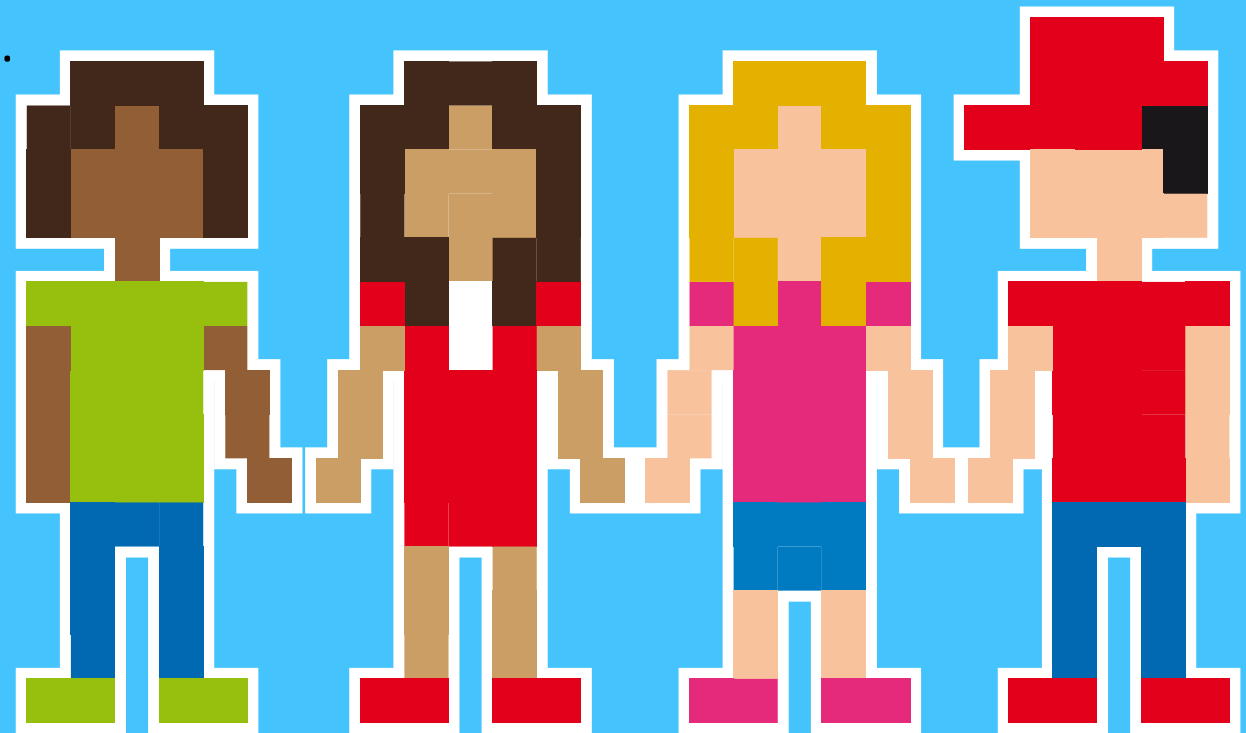

The Vision

Community Unity:

Real word connections and life-long friendships forming along the lines of wanting to progress up a skill tree, go on quests, create guilds and join factions.

Future Generations:

A place where our children learn, grow and protect each other; without the need of others.

Introducing Meta-Scaffolding

Concept:

A Mixed Reality (MR) platform where real-world individual and community collaboration translates into game-like progress.
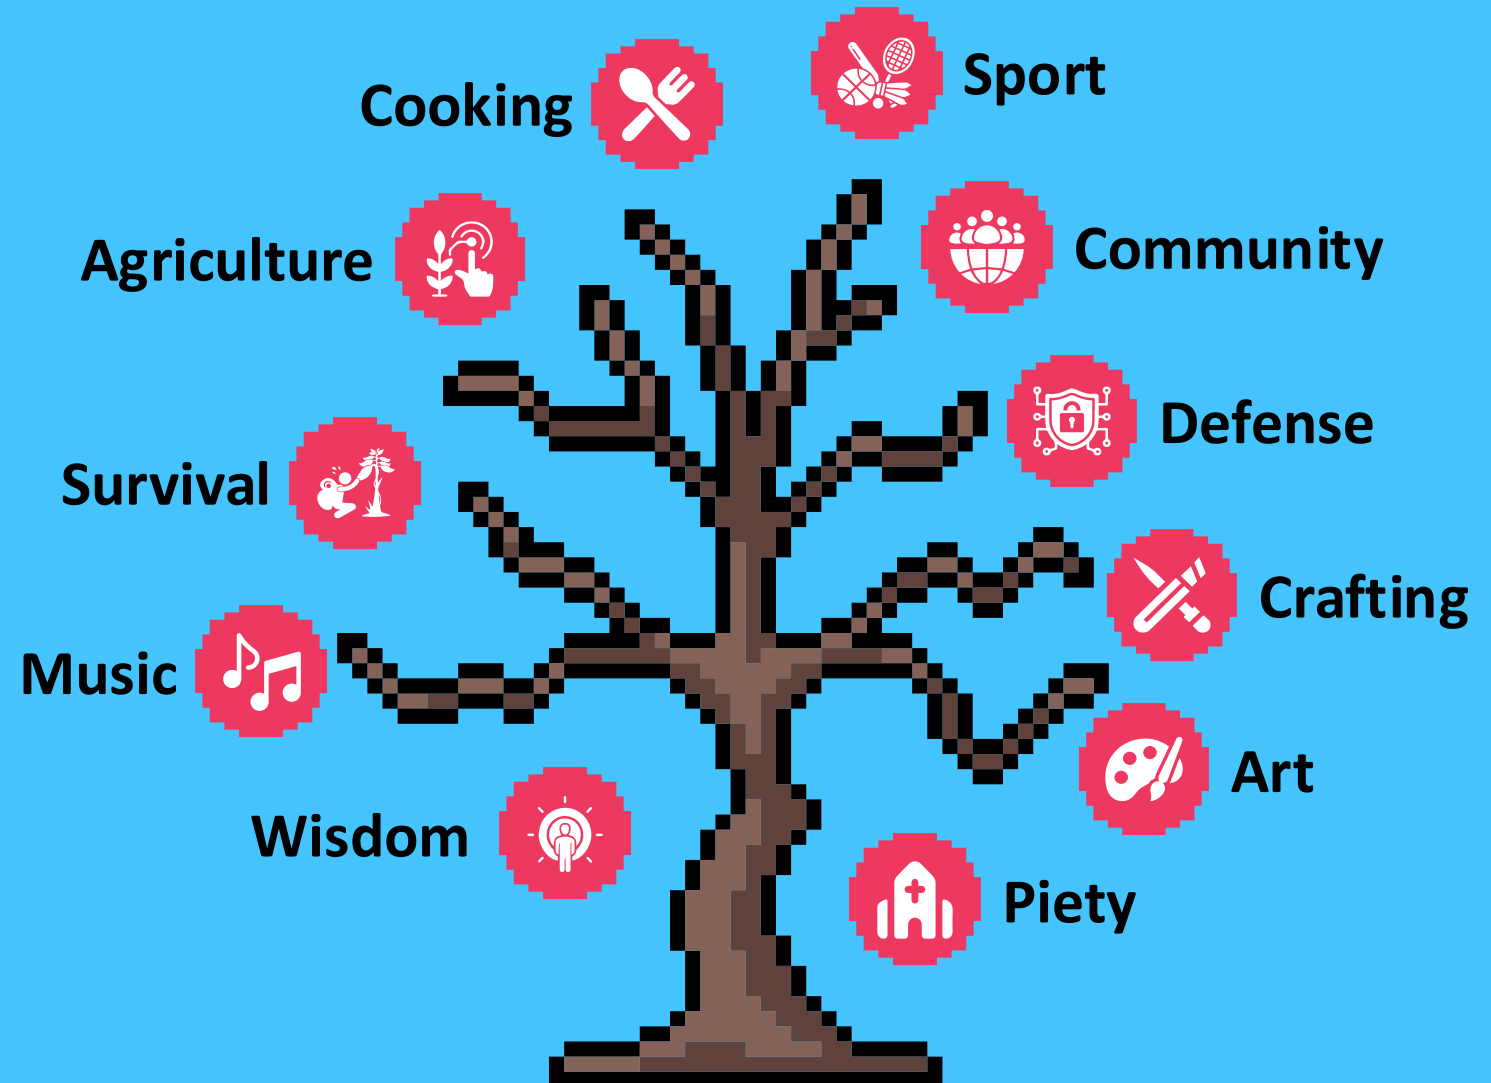

Purpose:

To provide a digital infrastructure geared towards fostering a sense of local, real-world friendships and connection.

Avatar and Skill Customization

Personalization:

Craft your digital self to represent your real-world skills, appearance, and community contributions

Cooking

Sport

Agriculture

Community

Defense

Survival

Music

Art

Wisdom

Piety

XP System

Earning XP:

Through community events, skill challenges, education, and co-operative tasks

XP Benefits:

Advance in skills, unlock avatar enhancements, gain community roles.
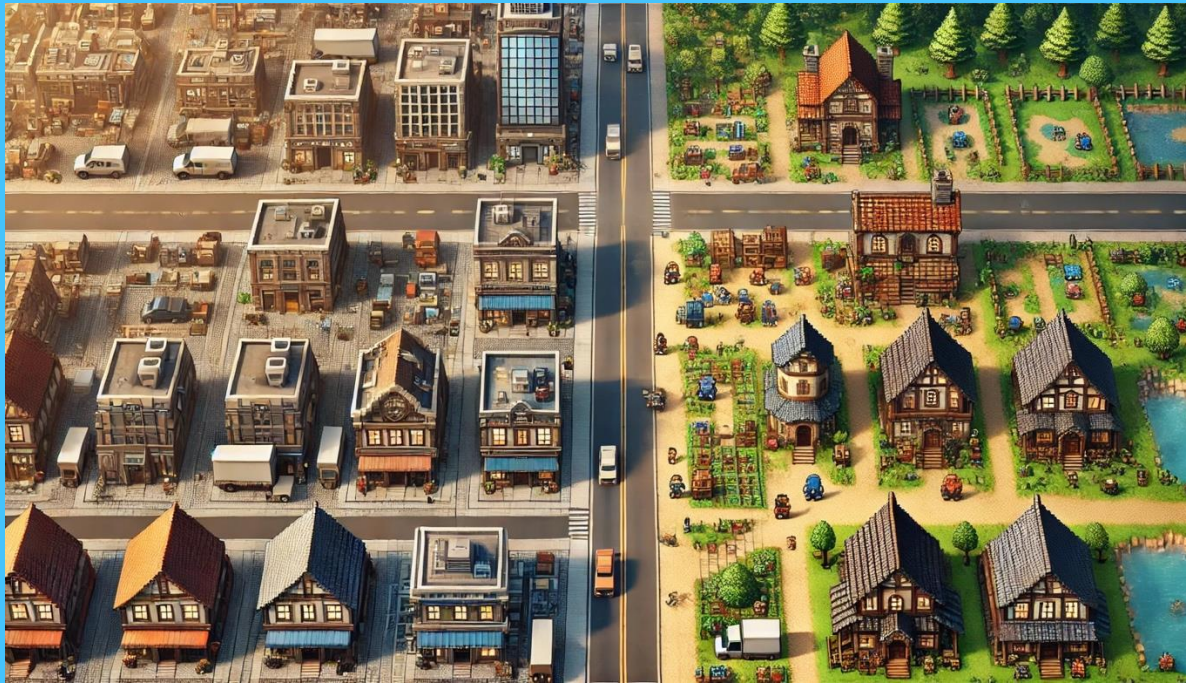

Badges and Titles

Badges for Mastery:

Gain avatar badges for unique or significant contributions to the community, showing others your dedication to real world action.

Titles for Leadership:

Earn unique elite titles for your character through being an agreed upon source of special skills, status and/or knowledge by others; or by completing quests to test your character and resolve in the real-world.

Community Interaction

Neighborhood Map:

One to one mixed reality (MR) layover of the real-world map providing an epic RPG quest like way to interact with your community and businesses

Guilds and Clans:

Form or join groups for shared interests or skills. Carpenters, Farmers, Police, Teachers and all others unite!

Economic & Survival

Local Marketplace:

Trade goods and services P2P using community currency, with blockchain integration and native token development being top priority.

Sustainability Projects:

Track resources, form collective buying agreements, cultivate community gardens or energy projects.
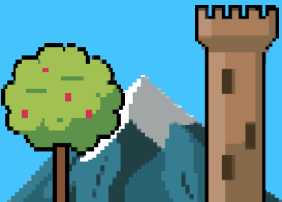

Education for the Future

Homeschooling & Co-ops:

Connection with other parents and the infrastructure to form community homeschooling co-ops. Allowing for the division of labor, resources and time; giving parents control of the education their communities future stakeholders.

Innovative Learning:

Micro-schools, community learning hubs and guild apprenticeships

Community Militia

Militia Formation:

> Organized

> Trained

> Ethical community defense

Training and infrastructure:

> Firearms

> Tactics

> Communication networks

Governance & Democracy

Community Constitution:

> Rules by the community

> For the community

Leadership Elections:

> Transparent

> Term-limited roles

Scalability & Security

Growth Strategy:

Individual connections to community engagement. Community engagement to regional collaboration. Regional collaboration to global movement.

Privacy & Security:

End to end encrypted communication and RWA tokenization; allowing for scalable, secure communications, trade and collaboration between individuals, communities, or organizations.

Developer Ecosystem

Mods & Plugins:

Robust and powerful Software Development Kits and API protocols to foster a customizable community driven application.

Geared towards Growth

Encourage expansion and growth of the platform by creating a community geared towards aspiring software developers and tinkerers

Monetization Models

Freemium:

> Basic features free

> Premium for extras

Multiple Streams:

> Ads

> Subscriptions

> In-app purchases

Real-World Integration

Check-In System:

Log real-world contributions for in-game progress.

Skill Sharing & Challenges:

Mentorship, workshops, community projects.

Emergency Preparedness

Resource Management:
Formation and management of community stockpiles, skill and resource mapping.

Drills & Simulations:
Regular practice for real-life scenarios with real time community simulations and situational awareness drills.

Cultural & Social

Cultural Preservation:

Events and activities to maintain community identity, while transcending political or ideological lines.

Social Connections:

Encourages real-life interactions, combats isolation and creates lifelong friendships.

The Bigger Picture

Sovereignty & Freedom:

A decentralized reservoir for the collective power and natural right of the citizenry; deriving its power from real-world connection and action of its constituents.

Community as the New Foundation:

A bottom-up approach to mending the self-inflicted wounds caused by decades of ideological and political differenced. Focused instead on our common hopes, dreams, beliefs and concepts of the divine

Call to Action

Join the Movement:

Be part of this resilience revolution.
