

Glen Lake Protective Association

Newsletter July 2019

Dear GLPA Members,

Our next MEMBERSHIP MEETING WILL BE ON JULY 8th AT THE GLENMOORE LODGE. Hamburgers, Hot Dogs, Rolls and Soda will be provided. Everybody bring a dish to pass. The cost is \$ 5 Dollars per person.

**Nominations** will be taken from the floor for anyone who wishes to run against the candidates who are up for election. The slate presented by the Nominating Committee - Bud Taylor VP, Ryan Windelspecht Treasurer, Michele Meyer Recording Secretary, Bill Miller Director, Paul Derby Director.

Please check the Glen Lake Protective Association Web Page - [glenlakeny-org](http://glenlakeny-org).

**AQUATIC INVASIVE PLANT MANAGEMENT** - Our Environmental Consultant Solitude has treated the lake for Milfoil. Please stay away from the Milfoil beds. We'll have more detail at the meeting. Our Diver Assisted Suction Harvesting ( DASH ) firm, Aqualogic is now on the lake. The hand pullers are working hard, getting into nooks and crannies. Let Margaret ( 518-793-4853 ) know if you have an area that needs treating. More details at the meeting on that.

The lake level is high. The Post Star had a story about boaters not being able to get their boat under the bridge to get out into Dunham's Bay on Lake George. We have had an enormous amount of rain. The Board at the dam is in. The By - Laws of the GLPA call for the Board to be in from mid - April to October. We will discuss at the meeting.

Please be sure to renew your MEMBERSHIP IN THE GLPA. Your support for the lake is critical to the success of the GLPA. We also want to acknowledge the generosity of Members who provide added support in addition to Membership dues. THANK YOU !

If you are aware of the passing of any lake resident please let an Officer or Director of the GLPA know so that we can notify all of our Members and residents.

Due to the recently enacted Town of Queensbury Septic Transfer Law and to the number of home purchases on the lake recently there have been a number of new Septic Systems installed around the lake. If you have installed a new Septic System and would like to share your experience with us we would love to hear about it. You may choose to be identified or remain unnamed - as you wish. I think it would be helpful for all of us who may be thinking about our systems ( or not ) to hear about the process, the cost and the time and effort necessary.

This is also a good time to remind everyone to have their system pumped out on a regular basis. This a contribution you can make that benefits you and the lake. Please practice safe boating and enjoy our beautiful lake. Respectfully, Paul McPhillips - President GLPA 518-791-6779.
