

Dear Glen Lakers, Our next MEMBERSHIP MEETING will be on Monday, June 14 at 7pm. We will continue with the virtual meeting format. The space we use at the Warren County Municipal Center is too small for our safety at this point in time. We will try and fix a date and location for our July meeting as soon as we can.

MEMBERSHIP - Your Renewal for Membership is enclosed. We ask you to please fill it out and return it. We appreciate your financial support for the Glen Lake Protective Association and we hope you see clear value in your membership. Your continued Membership supports the activities of the Association in protecting Glen Lake and keeping it clean for our continued enjoyment. Without your membership support we could not continue our efforts to make the lake as the enjoyable, recreational jewel that it is. If you know anyone who is not a member please tell them about the Association and ask them to be a member. If you have any questions about membership please contact our MEMBERSHIP SECRETARY - Linda Clark at Yglenlake@aol.cm.

INVASIVE SPECIES MITIGATION - It is expected the treatment will be around June 15. We will notify you of the exact date and any water restrictions as soon as we can. There will also be hand pulling later in the summer which will notify you of closer to that time.

ALGAE - The early season algae we are experiencing is common, and it a harmless green algae called Spirogyra or filamentous algae. The amount of algae has decreased in recent days and historically it disappears in early June. The first CSLAP report shows very good early season water clarity at about 16 feet with a chilly water temperature at 63 degrees. Observations around the lake note areas of Curlyleaf Pondweed that can be very invasive. However, the herbicide application scheduled for June 15 will control it.

SEPTIC TANK - Find your septic tank. Pump out your septic tank every two or three years or as needed. Glen Lake has been very good to all of us - recreationally and financially. Consider pumping out your septic tank as a way to pay back the lake for all the benefits it has brought to you, me and our families. Pay back the lake a little bit. Take good care of it and it will continue to take good care of us.

LARGE WAKES - Large wakes erode the shores of Glen Lake. The New York State Boating Regulations require that any boat exceeding 5 MPH stay 100 ft. from the shoreline. If you are making a large wake we are asking as a courtesy and for the protection of the shoreline of the lake that you stay farther away from the shoreline. The larger the wake the farther away from the shoreline you should be. Be good to the lake.

GLEN LAKE CLEANUP DAY - Thank you very much to all of the members of the GLPA who participated in our cleanup day on May 23.

If you have any questions at all about the Glen Lake Protective Association please contact me. Respectfully, Paul McPhillips, President GLPA. pmcphil@nycap.rr.com 518-791-6779. www.glenlakeny.org.
