

## High-Commission Opportunity (8%) – Sell AI Healthcare Stock Offering

I'm looking for a high-performing partner who knows how to close investors and wants to get paid well for doing it.

I'm the Founder of **Global Surgical AI Healthcare Inc.**, and I'm currently raising capital to accelerate development of our flagship platform — the **GS AI Core Digital Twin Platform™**. This is a next-generation AI system designed to transform surgery through real-time intelligence, imaging integration, and digital twin modeling.

Here's the opportunity:

- I'm offering **8% commission** on all funds you bring in
- Commission is paid directly from the capital raised
- **Minimum investment per investor: \$100,000**
- Open to structuring part of your compensation in **equity if you want long-term upside**

This is not a concept-stage idea — this is a platform-level opportunity positioned for scale across hospitals, surgical systems, and eventually multiple industries through digital twin technology.

We are also in parallel discussions for a **\$50M funding transaction currently in process**, but I'm not waiting on that to move forward — I'm building momentum now with the right partners who can bring in capital quickly.

What makes this attractive for you:

- High-ticket deal sizes = meaningful commission per close
- Strong AI + healthcare positioning (one of the hottest sectors)
- Clear investor story with platform scalability
- Founder-led support — I will help close deals with you
- Pitch deck and materials ready to go

If you have experience raising capital, working with investors, or closing financial deals — this is a serious opportunity to generate strong income quickly.

If you're interested, attached is the pitch deck and we can discuss how to move fast.
