PREP II and I

This **REFRESHER** course covers all aspects of boilers, including boiler operation and maintenance, mathematical calculation and theory, turbines, steam management, water treatment, and control systems for boilers, as well as pumps, motors and some HVAC theory.

KEEP in MIND, while this 13 week course covers MANY topics, it is not to be used as a substitute for the actual boiler, electrical or HVAC courses.

This REFRESHER course is to be used as a preparatory for the NIULPE exams.

CHIEF ENGINEER

The ***Chief Engineer Course*** presents the service skills, behaviors, and attitudes necessary to be a highly successful Chief or Lead in the trades. You will learn the customer service skills needed to communicate effectively with both external and internal customers, contractors, staff and facility personnel, while troubleshooting technical problems.

Our ***High Pressure Boilers*** course continues to be the best choice for preparing for high pressure boiler operator and facility operating engineer licensing. We cover a comprehensive overview of the safe and efficient operation of high pressure steam boilers and related equipment. The latest combustion control technology, as well as EPA regulations and their implications. This course is the perfect start to begin your journey as a licensed operating engineer.
