Slablox

About Us

Company Overview

Slablox's Labs is an Artificial Intelligences WEB 3.0 development technology company. **Slablox** blockchain technology creates unique and unrivaled physical asset-backed NFTs.

Physical Asset backed hybrid NFTs are the future, an extremely valuable way of spring-boarding forward, creating new layers of liquidity, and integrating physical assets into physical asset-backed NFTs.

Slablox's advanced A.I. 4.0 Nano grading application will instantly analyze the quality of a physical asset such as rare sports cards, rare colored diamonds, Fine art oil paintings, rare gold coins, and other rare fine collectibles.

The **application** will output an assessment of the asset's main features such as brand, maker, line, age, condition, and authenticity.

Slablox's AI Physical Asset Score

The Physically backed asset is scored, then the physical asset is assigned a physically Backed asset scored Slablox's AI Nano 4.0 deep learning program, searches for items in existence in that exact score this determines the rarity of each physical asset-backed NFT This score becomes the gauge for the value of the NFT based on its scarcity.

The physically-backed assets NFTs are uniquely numbered and assigned A **(SLABLOX)** the non-fungible token that doubles as a proof of **ownership** token and as a vehicle for redemption Using crypto and blockchain principles.

Slablox's AI 4.0 Nano Software uses Blockchain technology to Write, and create all assessments into smart contracts, creating **metadata** digital NFTs backed from the physical asset which keeps track of provenance.

Slablox's AI 4.0 Nano Blockchain NFT Minting application allows physical assets to be minted, creating metadata NFT from the physically backed asset on **Slablox's** AI mobile app.

SLABMINT AI Minting Application

SLABMINT AI App is a WEB 3.0 Artificial Intelligences NFT minting platform

Slabmint AI App is a seamless automated platform that provides individuals to mint real-world physical assets, turning physical assets into hybrid NFTs on their mobile phone or computer.

SLABMINT allows individuals, and companies to mint their assets, and sell their real-world physical asset-backed hybrid NFTS.

SLABMINT does not charge any credit card fees, theirs is no sales tax in our worldwide peer-to-peer venue with NO geo prohibitions.

Slabasset Physical Backed NFT'S

Bridging the **Digital and Physical** framework for secure on-chain trade of goods and in the future, the world's largest classes of **physical assets** including property, collectibles, and commodities of all kinds.

Unlike established **blockchain** NFTs, Physical Asset NFTs backed by an underlying **SlabAsset** Coin and paired with a physical asset result in an extensible, universal.

Now, new forms of **ownership** and utility can be programmed around objects: democratizing access to capital, unlocking trillions in stranded value, and paving the path to a more egalitarian and **sustainable society**.

Slabverse Market Place

Slabverse marketplace is an NFT marketplace connecting all NFT marketplaces into one ultimate NFT **MARKETPLACE**. **Slabverse** is a Crypto based worldwide peer-to-peer sales venue with traditional set pricing marketplaces.

Crypto auctions with digital wallet bid verification with realistic seller reserves so no one can shill up an NFT asset and not pay for it, snipe a **submission** at the last minute or pay pennies on the dollar.

Slabverse technology protects sellers from shilling and fraud. **Slabverse** provides safe, seamless, protected instant purchases of goods on a secure blockchain.

Slablox Airdrops

Hyper Growth Billion Dollar Industry

- Specialized NFT projects are bringing in **millions** of dollars.
- Diversify for a prosperous future -- profit from a **billion-dollar** industry.
- Alternative **investments** are essential to outpace hyper inflation.

Slablox Dynamics

Blockchain Circular Economy

▶ Bringing **trillions of dollars** of physical assets on chain

Increased trust removes the “doubt discount” from the decentralized digital trade of physical assets and therefore enables trillions of dollars of those assets to be brought on-chain and traded with confidence at their full value.

▶ Achieving global **sustainability** by driving the circular economy

In a world that consumes multiple planets’ worth of resources and is awash with excess physical assets, our goal is to restore balance. Rapid sustainability is achievable if every asset can be efficiently resold and re-used within a circular economy.

▶ Maximizing value and liquidity for **decentralized commerce**

Slabasset Coin allows the individual value of every asset to be confidently assessed according to its exact state, whether new, previously owned, or collectible, enabling it to transact towards owners that value it the most.
