# Access Software

Cobra Controls™ .net Access Control Software
Unlimited controllers, unlimited doors, 20,000+ users
For ACP series access control panels providing a powerful security solution.

Features:

- Online tutorials for every function of software. Ideal for new users, experienced users, and installers.
- IP Addressing: Built in search network feature finds controllers on network. Easy to reassign IP address from the software. No need to visit controller to push buttons or move jumpers. (see photo)
- Unlimited departments and sections
- Unlimited number of control panels and doors on same system
- Lost card registry with simple reissue feature
- 255 time zones with start and stop dates. *Ideal for time based membership applications such as gyms and clubs.*
- Simple access privilege user interface.
- Unlimited operators with assignable authority levels. (Operators manage system software)
- Easily configure *card* plus *pin code* for keypad/proximity combination readers
- Assign ACP-1x4 emergency input 4 output module relays with adjustable duration or follow event settings. Emergency input unlocks all doors upon signal.
- Anti-pass back built in and assignable locally within controller.
- Interlocking for 1,2,3, and even 4 doors made simple. Panel and software handle all the logic necessary to keep area secure and also safe.
- Multiple card access assignable to require more than one user to enter an area. Also optional multiple card exit can be assigned. (Election areas and cash rooms for example.)
- First card in to activate unlock time zone is flexible. Can use any single or multiple users to activate to ensure proper personnel on premises to unlocked area.
- Audit trail customizable by date, department, user, and/or by door. Report layout also flexible. Save as excel spreadsheet, print, or view.
- Time and attendance built in. (Another specification sheet available for this feature)
- Meal reports for facilities wishing to monitor dining areas. Nicely flexible for different needs.
- Guard tour system built in. Use access control system readers to create and manage a guard tour system. Completely customizable for patrolman, patrol points, patrol routes, and patrol tasks. Creates both a patrol report and a statistical report about the guard tours.

Access Software

The Cobra Controls .net Access Control Software also offers a powerful real time monitoring and management interface. Watch as the computer scans doors and reacts to real time events. Note: Live connection to controllers not required for doors to operate - needed only for live interaction.

Features of real time monitoring screen:
Check command performs status and diagnostics on selected doors and their controllers. Setting time synchronizes controllers to the computer for timing.
Upload and download from this interface to update both the controller with correct access privileges and to receive latest auditing information. A real-time download option keeps you up to the second with event monitoring.
Remote locking and unlocking of any one or all doors is a simple mouse click.
You can "lock down" or lock open any one or multiple doors. Momentary unlock a door and then it will go back to normal access state. Reset alarms via mouse.
