

# COLLABRA

## Enhance performance with real-time employee insights

An application that connects all employees and enables them to share their knowledge and for management to measure productivity.

### Collaboration

### Engagement

### Knowledge Exchange

## Our Mission

To maximise the productivity of employees, thereby improving the performance of companies.

## Productivity

Financial accounting classes employees as a business cost. But in reality they are it's biggest asset. Maximising the exchange of employee knowledge to help grow a business is critical.

## Our Thesis

Employees are not passive recipients of internal communication and information. They are active participants who can contribute to the creation, distribution, and evaluation of ideas. By connecting employees you can increase their engagement, ownership, and trust, and tap into their insight, ideas, and feedback to grow your business.

With live analytics on employee engagement and productivity, you can understand, monitor and adapt your business' culture and performance.

## Integrations

Microsoft Teams

OpenAI
