

FIRE SAFETY AND PREVENTION

Whether the winter and summer seasons are abundant with moisture that promotes the growth of flowers and grasses that can become fuel in a fire or if drought conditions persist, there is always a risk of **fire** in and around our beautiful mountain town. Summer monsoon storms with lightning along with regular wind events also contribute to overall **fire risk**.

It is very important for residents and guests to be mindful of all behaviors that might increase the risk of fire. It is imperative, for the safety of our community, homes and surrounding area, that all homeowners be especially mindful of fire risk throughout the spring, summer and fall season. Please be especially attentive when grilling or using tools that could cause sparks. Per the CC&Rs, open fires are **prohibited** and charcoal fires on decks are **prohibited**. Natural gas, propane and electric grills are allowed *but must be used with caution*. Additionally fireworks and similar are **prohibited** at all times. Smoking devices such as cigarettes, cigars and matches should be disposed of in appropriate containers.

BE PREPARED!!!! Coconino County has updated their emergency notification system for alerting county residents of impending and significant weather events, emergencies and other events that warrant immediate resident contact. It is highly recommended that you sign up for the current system if you have not already done so. To sign up for the current program, you may do so by going to the following website: [Coconino.az.gov/ready](https://www.coconino.gov/ready). There are a variety of contact options available to you so that you may select the contact format that best suits your specific communication needs. If you have questions about the program and need assistance in registering for the program, please contact the Emergency Management Office at 928-679-8311.
