

Prevent Fires!!! Dispose of Cigarettes Responsibly!!!

This is a reminder to all residents and guests who smoke cigarettes and other smoking materials that it is imperative at all times that matches, cigarettes and smoking materials are disposed of properly. Given the very dry nature of our Northern Arizona climate as well as the absence of rain and snow, ground materials, specifically dry pine needles can easily ignite if matches, cigarette butts and similar are thought to be extinguished and tossed onto common property. It only takes a spark and our community could face a serious fire danger. Additionally, cigarette butts pose a threat to birds and other wildlife.

PLEASE be a good community member and smoke and dispose of smoking materials responsibly!!!

If you have any additional questions or concerns, please contact the community property .
