Dear Ms. Bose,

*P-14227-003*

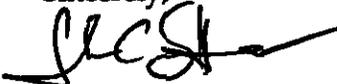

**REGULATORY SUPPLY**

The L.E.A.P.S. proposal to have a private company come into our Cleveland National Forest and set up a power plant is a HORRIBLE idea, which will cause the deaths of so many plants and animals in our rapidly-shrinking national forests. These forests are to be left to our children, and their children, not exploited by private companies. I'm sure there are much better options to generate power in the area. I am a resident of the area, living on the outskirts of the Cleveland National Forest at 34040 Ortega Highway in Lake Elsinore, and this will have a negative impact on me and my family. There will be a whole lot of construction traffic on the road I rely upon to get to my home, not to mention the fact that all this massive construction would be done along a fault line. This is a National Forest. It has been reserved to be preserved for generations to come. It is off limits for private investments.

I have many friends in the area of the Lake Elsinore, and some of their lives would be completely uprooted. I cannot even fathom that this is being considered in one of our National Forests! The Trump philosophy of making money at ANY cost is not a good one. There's more to life than money. Please leave our National Forests alone and do not allow a private corporation to destroy the limited natural resources we have left to leave future generations.

Thank you for your consideration in this matter.

Sincerely,

John Sotter  
Senior Technician
