## DMR EMPLOYMENT JOB DESCRIPTION

---

### **ELECTRONICS TECHNICIAN**

New 2026 career opportunity in Panama City Beach, Florida in support of the military (USN, Army, USAF). Candidate must demonstrate minimum five years' experience in the maintenance, sustainment, and modernization of mission critical, electrical systems for the Navy. This position assembles and fabricates controllers, cable assemblies, connectors, wire harnesses, and circuit boards in accordance with DOD technical instructions. Responsibilities include electrical testing, cable fabrication, troubleshooting, test reports, and building electronic components per technical drawings.

Desire candidates with technical skills, knowledge and previous experience (military or DOD) in electronic repairs and custom fabrication utilizing configuration mapping, wiring diagrams, machinery, power hand tools, soldering and a variety of calibrated electronics equipment. The assembly and testing of sub-systems are conducted off base in the contractor's Depot Repair Facility (DRF) Electronics Lab. Potential applicants must be able to technically demonstrate electrical expertise in documented military projects, prototype designs, circuitry development and operation of electronic test sets. Proficiency in reading government technical data packages (TDP) to include drawings generated in AutoCAD or SolidWorks is required. Work orders will be issued and completed independently in accordance with statement of work and under the direction of Engineers.

### **REQUIRED QUALIFICATIONS:**

- Must be U.S. Citizen
- High School graduate or Technical School certificate equivalent
- Must have minimum 5 years direct experience as electrical and/or electronics technician
- Experienced in electrical assembly, cable fabrication, wiring harnesses, custom built electronic circuit boards and integration of electronic components.
- IPC J-Standard Soldering Certification and/or Cable Repair Certification
- Experienced in Dielectric Strength (Hipot) Testing, Insulation Resistance, and Continuity Testing.
- Experienced in potting composite connectors and cable assemblies

### **BASIC QUALIFICATIONS:**

- Ability to analyze and interpret Technical Data Package (TDP) drawings and specifications for fabrication requirements, testing instructions, and assembly layout.
- Knowledge of electrical design installation and troubleshooting electronic system components.
- Experience in building multi-level circuit boards and coordinating with electrical engineers.
- Assist with fabrication of military equipment using specialized tooling and testing instrumentation.
- Assist with solutions for parts obsolescence and spares needed for repair and maintenance.
- Must be able to lift, carry, and pull up to 50 lbs. in loading equipment or supplies
- Applicants with OSHA certifications and/or previous government training preferred.
- Must complete background check or be eligible for government security clearance
