

Hotels and Resorts

**Guaranteed
fully effective
for 12 months!**

According to a study conducted by the University of Houston in 2012, it was found that hotels and resorts often fall short in terms of cleanliness and hygiene. The study examined various surfaces in hotel rooms, including light switches, telephones, door handles, TV remotes, and countertops, discovering high levels of harmful residual pathogens.

In a recent test against MRSA, UK university professors stated that:

"Resysten™ system is one of the most active protective coatings that we have tested in over 20 years of university research."

Dr. Patrick Dunlop, University Ulster UK

The **invisible** disinfectant protective coating

By using Resysten™ hygienic protective coating technology, you ensure an uninhabitable environment for biological contaminants on any treated surface, preventing their survival.

- + Continuous disinfection
- + Reduces labour costs
- + Ensures employee efficiency
- + Prevents chemical waste
- + Provides sustainable work practices
- + UV stable

Lab tested and client proven results

- + Third-party broad-spectrum testing
- + GLP labs tested
- + SGS/EUROFINS Lab tested
- + University lab tested
- + EU Biocidal Products Regulation compliant

ANTI-VIRAL

Proven to kill (GLP lab tested) SARs CoV1, SARs CoV2, Ebola, HBV, HCV, MERS, HIV, MVA, PRV

ANTI-FUNGI, ANTI-MOLD

Prevents (GLP Lab tested) moulds and fungi such *Candida albicans*, and *Aspergillus brasiliensis* from growing.

ANTI-MICROBIAL

Proven to kill (GLP lab tested) hospital superbugs, MRSA, *Clostridium difficile*, and deadly bacteria *Listeria monocytogenes*, *Escherichia coli*, *Salmonella*, *Pseudomonas aeruginosa*, *Enterococcus hirae*, *Staphylococcus aureus*.

ANTI-ODOR

Resysten has a direct impact on the odors omitted from public toilets, paints, building materials, cosmetics, smoking, fabrics and more.

With Resysten you can...

...LOWER THE RISK OF INFECTION

Help minimize the transmission of illnesses among visitors and staff, contributing to a healthier environment.

...MAINTAIN HYGIENE IN THE MOST CHALLENGING AREAS

Inhibit the growth of bacteria, viruses, fungi, and other microorganisms on surfaces, reducing the risk of cross-contamination and the spread of germs.

...ALWAYS BE PREPARED

Ultimate 24/7 line of critical defense against nosocomial infection

...ODOR CONTROL

Antimicrobial coatings have properties that reduce unpleasant odors caused by microbial growth. These coatings contribute to a fresher and more pleasant atmosphere within the hotels and resorts.

...BE COST EFFECTIVE

One time application, up to 12 months effectiveness.

...BE MORE SUSTAINABLE

Less chemicals sprayed, less CO₂ due to less shipping, less plastic container usage.

Added Protection!

Resysten™ resists mould formation, particularly in high humidity areas such as bathrooms and storage areas, reducing health risks. By using Resysten™ coating, hotels and resorts can prioritize cleanliness, enhance guest satisfaction, and provide a safe pleasant environment for visitors.
