

Sports Clubs & Gymnasiums

**Guaranteed
fully effective
for 12 months!**

Research has demonstrated the profound impact of cleanliness in high-traffic areas such as sports clubs and gymnasiums on people's experiences and behaviors. A study published in the Journal of Environmental Psychology found that individuals visiting fitness facilities rated cleanliness and hygiene as top factors influencing their satisfaction and likelihood of returning. The research revealed that visible cleanliness, including well-maintained equipment, spotless facilities, and fresh-smelling spaces, positively influenced patrons' overall experience and their intention to revisit the gym.

Furthermore, the study highlighted that perceived cleanliness directly correlated with users' sense of well-being and comfort, underlining the importance of maintaining high cleanliness standards in high-traffic areas to foster positive customer perceptions and loyalty.

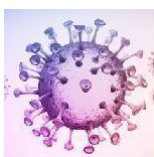

In a recent test against MRSA, UK university professors stated that:

"Resysten™ system is one of the most active protective coatings that we have tested in over 20 years of university research."

Dr. Patrick Dunlop, University Ulster UK

The **invisible** disinfectant protective coating

By using Resysten™ hygienic protective coating technology, you ensure an uninhabitable environment for biological contaminants on any treated surface, preventing their survival.

ANTI-VIRAL

Proven to kill (GLP lab tested) SARs CoV1, SARs CoV2, Ebola, HBV, HCV, MERS, HIV, MVA, PRV

ANTI-MICROBIAL

Proven to kill (GLP lab tested) hospital superbugs, MRSA, Clostridium difficile, and deadly bacteria Listeria monocytogenes, Escherichia coli, Salmonella, Pseudomonas aeruginosa, Enterococcus hirae, Staphylococcus aureus.

ANTI-FUNGI, ANTI-MOLD

Prevents (GLP Lab tested) moulds and fungi such Candida albicans, and Aspergillus brasiliensis from growing.

ANTI-ODOR

Resysten has a direct impact on the odors omitted from public toilets, paints, building materials, cosmetics, smoking, fabrics and more.

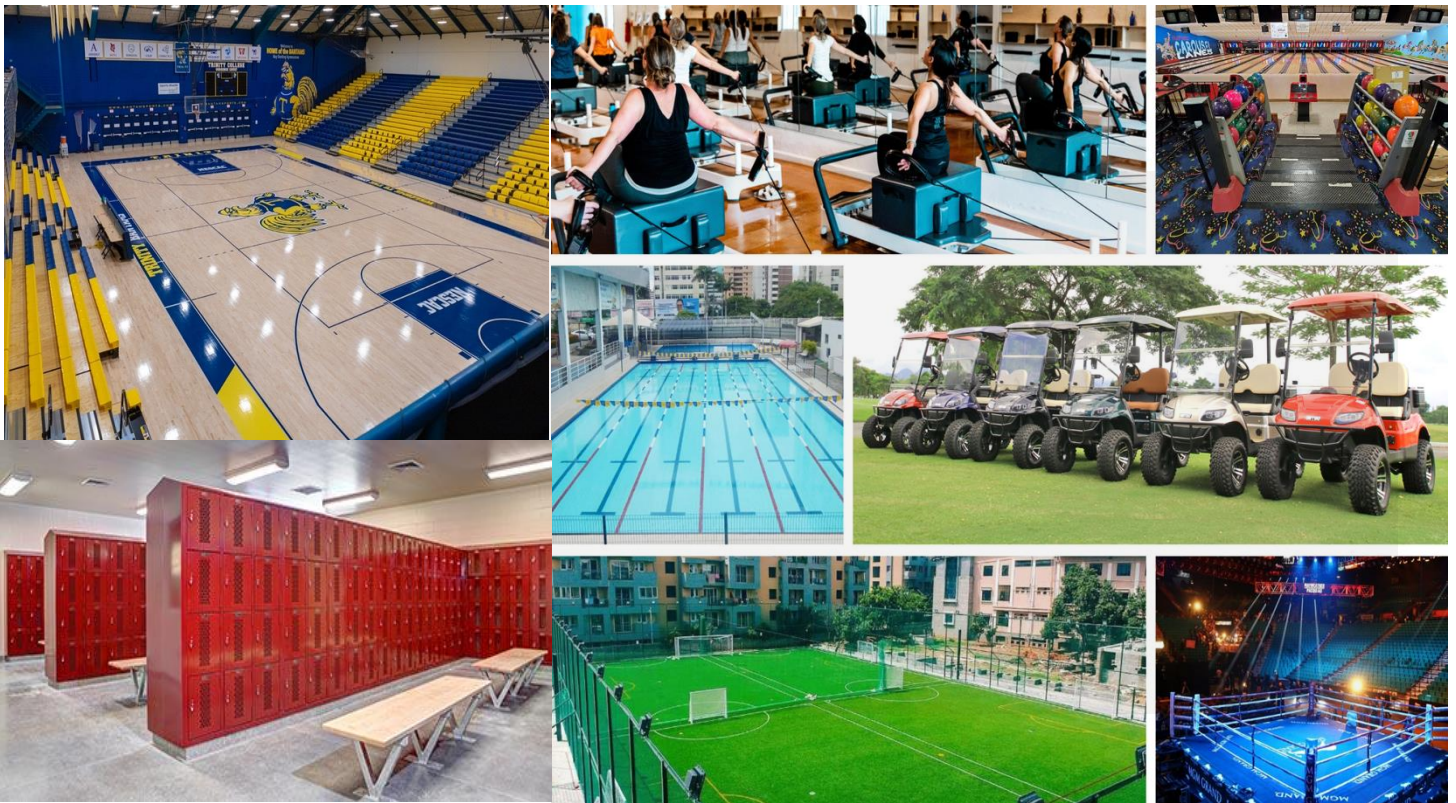

- + Continuous disinfection
- + Reduces labour costs
- + Ensures employee efficiency
- + Prevents chemical waste
- + Provides sustainable work practices
- + UV stable

Lab tested and client proven results

- + Thirdparty broad-spectrum testing
- + GLP labs tested
- + SGS/EUROFINS Lab tested
- + University lab tested
- + EU Biocidal Products Regulation compliant

... **Resysten™** offers a versatile and comprehensive solution for maintaining optimal hygiene and safety in diverse high-traffic environments such as sports clubs, gymnasiums, yoga studios, Pilates facilities, golf carts, locker rooms, restrooms, equipment areas, dining spaces, reception areas, and other locations with frequent touch points. By incorporating Resysten™, these establishments effectively reduce the risk of infections and uphold stringent hygiene standards in the most demanding areas, promoting a healthier environment for patrons and staff alike.

The product's advanced odor control capabilities, cost-effectiveness, and sustainable nature further contribute to its appeal, providing long-term benefits while minimizing operational costs. Moreover, its proactive approach ensures that these spaces are always prepared to combat potential health risks, while its additional protection against mould, viruses, and microbes enhances the overall safety and well-being of those who utilize these facilities.
