

Product details

FMC Direct proudly presents its newest health and wellness solution, The “ISO-ATOMIZER”! We are excited to offer our cutting edge, durable, wireless, battery powered, multi-purpose and handheld sanitizing spray gun.

In this day in age, it's not good enough to just wipe a surface. Our rechargeable ISO Atomizer turns the germ fighting power of our 70% Isopropyl Alcohol into a vapor and covers more surface than a rag ever could. UV Rated LEDs are built right into the front of the ULV diffuser gun and are designed to target germs on surfaces and in the air. Germs have not developed resistance to a specific wavelength of UV light energy, which means UV treatment is very effective and will keep your environment cleaner and safer. Give your customers peace of mind and add our Nano Atomizer to your cleaning arsenal.

I today.

Whether you are a business owner, cleaning professional, a stay-at-home parent or even just a conscientious healthcare guardian the ISO-Atomizer electrostatic disinfectant gun was made with you in mind. Our lightweight portable design makes our disinfectant spray gun the perfect companion for adding extra defense against harmful viruses and bacteria. Giving you, your family and/or your employees and customers a more well protected experience, with the added bonus of promoting more overall stress relief. We hope to make you feel like you are in the eye of the hurricane in these turbulent times.

Not only is our handheld atomizer a sanitizing machine for the home, office, and travel destination. Because we made our steam gun handheld and gave it versatility of liquid use it can be used to spritz your plants or even your family with water on one of those particularly hot summer days. So long as you are aware of what you have chosen to fill your fluid reservoir with, it can be used on the widest array of surfaces. It works everywhere excluding direct contact with electrical equipment.

FMC Direct is based in Fort Lauderdale, Florida. We have inventory of isopropyl alcohol and ISO Atomizers to keep you well-stocked and well served. Please refer to the quick start guide for more details. We look forward to providing you our life improving products and services.

- **PORTABLE DISINFECTION SPRAYER GUN:** This personal atomizer is ultra-lightweight and the handheld nano sprayer or disinfecting fogger machine is portable so it can conveniently be stored in an average sized backpack or suitcase. when you plan to travel, it can easily be carried to help you improve the health protection level in any given space.
- **FREE GIFT:** This listing includes one free quart of Isopropyl Alcohol along-side our sprayer disinfection machine. Make sure to dilute with water 2 parts alcohol, one part water before use. Make sure to check out the other options where you can stock up on 70% Isopropyl today! Every option still comes with one quart (32 OZ) free. There are no restrictions on liquids. You can use virtually any type of liquid. Gel products need to be diluted before they can be used. This makes it an effective atomizer garden sprayer, home or workplace sanitizer and/or to assist you with all virus disinfectant needs.
- With an 800 mL clear plastic reservoir bottle tank, the Atomizer Fogger uses the principle of superheated steam and pressurizes liquid water into gaseous superheated molecules. Whether you need it as a home sanitizing machine or have a business and need a

commercial fogger machine, this nano portable mist sprayer will be the best solution for room atomizers. strong air pressure forces the electric fogger, or steam gun, to create fog droplets that are uniform (HVPL sprayer: Output range 5FT)
