

INTERSTATE

SIGN AND LIGHT

Interstate Sign and Light is a full-service business signage company that serves hundreds of customers in Orlando, Central Florida, and across the US. With a team consisting of lighting and signage experts, we will provide you high-quality services to bring about your satisfaction. Be it high rising buildings or high-reach infrastructures, fear not, ISL's installation team can serve you.

What we do

■ PYLON SIGN

Pylon signs make you stand out. They are free standing posts you come across the street in front of shopping malls and commercial buildings.

■ CABINET SIGN

A box is full of surprises. A cabinet sign is an internally illuminated sign in which a removable sign face, usually with translucent sign graphics, is enclosed on all edges by a metal cabinet.

■ BLADE SIGN

A blade sign is a type of projecting sign mounted on a storefront pole or attached to a surface perpendicular to the normal traffic flow mainly to attract foot traffic into your establishment.

■ CHANNEL LETTERS

Channel letters also known as "internally illuminated letters" adds depth to your company's signs. Anything related to channel letters, that's what we do.

■ NEON SIGN

Neon signs are electric signs lighted by long luminous gas-discharge tubes that contain rarefied neon or other gases. They are best in attracting traffic into your establishment in dark areas or at night.

What we do

■ MONUMENT SIGN

A Monument sign, usually defined as a ground sign, is used for its versatility and functionality. It can display a multi-tenant shopping center's signages, proving its advantages over other signages.

What we do

■ DIRECTIONALS

Directional signs are signs used to indicate entrances and exits of establishments that include parking lots and garages.

What we Offer

What are signages?

Signages are the core element used by establishments to attract people. When we say people, we mean customers, lots and lots of customers often called traffic. Without signages, more or less, we will lose that attraction. Then that's when we come in. ISL is a **signage company that helps customers deal with the installation, fabrication, repair, and removal** of their signages. Our services include **technical surveys, permitting, and final inspection** to save our clients their time and energy. We are a team that takes pride in our one-stop services as we believe that doing things right is a cut above all. By using our systematic operation, our customer's sign and light services are in our care.

Our Services

We are a team that loves simplifying things. To prove that, our project-based services offer our clients peace of mind to leave the project in our care while we complete the job. When we say project-based, we mean we do everything. From installation, sign fabrication, removal and repair, permitting, and schedule the final inspection. All you have to do is get a quote, place an order, then we finish the job to your satisfaction.

■ INSTALLATION

Our team of dedicated and fully-trained installation experts will help you streamline the installation process. We aim to ensure the success of our project. Thus, our installers possess a sound understanding of the applicable construction and installation techniques to demonstrate precision in meeting the client's specifications.

■ PERMITTING

We get Florida construction permits by simplifying the building permit process. We have experts with years of experience in this area, allowing us to get your projects approved faster. With a clear understanding of the building code, permit fees, and project requirements specific to each jurisdiction, our project managers can handle all of the submittals and paperwork while coordinating between city, county, and local government bodies. Thus, preventing common delays in starting your projects.

■ REPAIR AND REMOVAL

Adding new signs or light to your building is not as easy as it sounds. Most of the time, some problems will crop up when you remove your existing signs when mishandled. Here are the common issues our business owners face when removing or repairing signs: stuck nuts and bolts, fading paint, water damage, facade/wall damage, wiring disconnection, old sign disposal, and storage. If you are unsure of how to proceed, then you have come to the right place. Our team can do that for you!

■ SIGNAGE SURVEY

To ensure that your sign project is a success, having a complete and comprehensive site and sign survey is a crucial step to be conducted. Signage surveying allows us to determine the correct location of signages. Our team offers a signage survey and analysis that includes photographs, building dimensions, and reports with pertinent information regarding each specific placement. If you're looking for a sign survey service, then we're the right team for you.

What Our Customers Are Saying

"Interstate Sign and Light pulled together a same day project for us that was seamless and far exceeded our expectations. We have worked with many sign companies in Jacksonville and found ISL to be prompt and professional.
STRONGLY RECOMMENDED!"
