

Kelly Niestzsche

My family is from Puerto Rico. I was raised in Fort Lauderdale, FL. My love for aviation has landed me a job in Houston, TX, where I currently reside and have been living the past 23 years. My sister and I purchased land in Florida with the thought that we would some day build a house there.

I often think about moving back to Florida and have been looking at houses there for the past year. I have looked at many houses and decided why not build my own house. Wanting to learn more about the dos and don'ts regarding building on my property, I thought it would be vital for me to be part on the HOA for Twin Rivers Preserve.

I graduated from Embry-Riddle Aeronautical University with a bachelor's degree in Aerospace Studies. I also hold a minor in math and aviation computer science. Biking, running, and hiking are just few of the many activities I enjoy. My hobbies include reading, hanging out with friends, and trying out new recipes. I do believe I will make a good asset to Twin Rivers Preserve Property Owners Association.
