mellows  Students.  at a time to fuel fire when required.  All students to remain focused those struggling may need extra support from staff.  Make sure the skewers are a reasonable length so that students are not too close to the fire.  Ensure the site is away from anything combustible and have water to hand.  Give clear demo on how to toast marshmellow.  Med  Med  Med  Med  Med  Med  Students  Students clearly explain as to what a suitable distance is from the fire  Place marshmallow between two biscuits when ready as this speeds up the cooling process.  Use a kneeling position for children to improve balance, and prevent falling towards fire.  Ensure children are not to far away and leaning towards the fire  Mark out a clear chopping area.  Med  Students  Med  Close supervison and strand refresh instruction multi person use.  Activity to be monitored at all times.  Med  Close supervison and strand refresh instruction the instructor feels thi important.  Wed  Use of fixed blade knife  Staff and students.  Clear and definite instructions on safe use.  Suitable working area to be marked out.  Knife should be placed in sheaf when not in use.  Only safety knives should be used.  Always cut away from themselves and others.  Med	Hazard	Possible Harm	Control Measure	Risk Rating	Further Action
Students  Demonstrate the safe practice for both individual and multi person use. Activity to be monitored at all times. When saw is not in use it should be in its sheath or put to rest vertically with teeth against the ground.  Med  Use of fixed blade knife  Staff and students.  Clear and definite instructions on safe use. Suitable working area to be marked out. Knife should be placed in sheaf when not in use. Only safety knives should be used. Always cut away from themselves and others.  Med  If the group is strugglir or there is an increased risk of injury instructor should switch to potato peelers where approprice.			<ul> <li>at a time to fuel fire when required.</li> <li>All students to remain focused those struggling may need extra support from staff.</li> <li>Make sure the skewers are a reasonable length so that students are not too close to the fire.</li> <li>Ensure the site is away from anything combustible and have water to hand.</li> <li>Give clear demo on how to toast marshmellow.</li> <li>Make sure students are not setting the marsh mellows on fire, and explain the possible outcomes regarding hot sugar.</li> <li>Place marshmallow between two biscuits when ready as this speeds up the cooling process.</li> <li>Use a kneeling position for children to improve balance, and prevent falling towards fire.</li> <li>Ensure children are not to far away and leaning towards</li> </ul>	Med	Students clearly explained
blade knife  • Suitable working area to be marked out.  • Knife should be placed in sheaf when not in use.  • Only safety knives should be used.  • Always cut away from themselves and others.  • Med  or there is an increased risk of injury instructor should switch to potato peelers where appropriate	Use of Bow Saw		<ul> <li>Demonstrate the safe practice for both individual and multi person use.</li> <li>Activity to be monitored at all times.</li> <li>When saw is not in use it should be in its sheath or put</li> </ul>	Med	Close supervison and stop and refresh instructions if the instructor feels this is important.
