

## Changes Coming to PGDP Health Screening Process October 27

Starting Tuesday, October 27, site personnel will no longer conduct health screening at the vehicle gates at the Hobbs Road Access Point. Instead, workers should proceed to a facility equipped with a “self-check” health screening kiosk (see attached map for list of locations). There are approximately 25 kiosks located in key areas throughout the site. MCS will have four of these units on site; C-1100 Lobby, C-1215, C-1220, C-1100-T01.

Each kiosk location is equipped with one or more touchless body temperature thermal scanner units that workers will use to confirm their temperatures are not elevated. HealthWorks personnel will be on hand for the first 7 to 10 days to assist with the process.

Workers who are on site will receive a crew briefing, or appropriate training, that includes instructions on how the kiosks work. This will also be an opportunity for workers to ask questions. Briefings are being scheduled for on-site workers by MCS Training. Those who are teleworking will receive access to a training upon return to the site, or via video that will be distributed (more details will be announced).

Employees are expected to follow the same protective measures they followed when HealthWorks conducted the health screenings prior to entering the site.

If you are sick, stay home. Starting October 27, health screening questions will change to the following:

1. Do you have or has anyone in your household had any of the following COVID-19 symptoms over the past 14 days? (Fever or chills, cough, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea)

**Note:** *Seek emergency medical attention for trouble breathing, persistent chest pain or pressure, new confusion, inability to wake or stay awake, and/or bluish lips or face, as these may be emergency warning signs for COVID-19.*

2. Have you, or has anyone in your household, had close contact\* or direct contact\*\* with any person confirmed positive or being investigated for (test pending) COVID-19 in the past 14 days?

\*Close contact is defined as being within approximately 6 feet (2 m) of a person confirmed positive or being investigated for (test pending) COVID-19; close contact can occur while caring for, living with, visiting, or sharing a healthcare waiting area or room with a COVID-19 case.

\*\*Direct contact is defined as direct contact with infectious secretions of a person confirmed positive or being investigated for (test pending) COVID-19 (such as, being coughed on).

3. Have you traveled out of state or internationally within the past 14 days? If so, did you travel to any state reporting a high number of COVID-19 positive tests (≥15 percent) or a foreign country identified as Level 3 High Risk by the Centers for Disease Control and Prevention (CDC)?

**NOTE:** *Domestic travel guidance was implemented on July 29, 2020. International travel guidance went into effect on July 31, 2020.*

Workers who answer “yes” to any of these questions should contact the Site Medical Provider at 270-441-5766. These questions and instructions for how to use the kiosks will be posted at each location. Workers will receive a new COVID-19 Health Screening card in the coming days.

Please contact Joe Johnson at 2231 or Ashton Haus at 2039 with questions.
