

## **PGDP Pre-screening**

In order to minimize the spread of COVID-19, Occupational Medicine began pre-screening workers and vendors entering the Paducah Gaseous Diffusion Plant at the C-104 entry gates on April 2, 2020.

Workers and vendors will be asked a series of questions about recent activities and health status. Temperatures will also be taken. This process is expected to be completed in under a minute.

Inbound traffic restrictions will be implemented at C-104. Vehicle access gates will be manned from 5 to 6:30 a.m. and 5 to 6:30 p.m. to accommodate all contractor shift changes. If anyone requires access to the site outside of those times, they should contact the Plant Shift Superintendent (PSS) at (270) 441-6211 to coordinate a pre-screening before heading to the site. This guidance applies to anyone performing work on site, including vendors. To the extent possible, please coordinate your time of entry to the site during the times Occupational Medicine is manning the gates. If this is not possible, then coordinate a pre-screening in advance with the PSS before entering the Paducah Site.

We ask that you be patient as we implement this process and be cautious when accessing the gates at Hobbs Road due to the medical professionals being in the area.

If you have questions, please send an email to [contactus@pad.pppo.gov](mailto:contactus@pad.pppo.gov).
