

## World EFT Summit 2024

# Maintaining hope in a world of uncertainty: The art and science of EFT

Save  
the  
date!

June 3rd and 4th  
2024

The Netherlands  
(Europe)

In a world of uncertainties, we all are struggling to keep our emotional balance. People are migrating all over the world, trying to find shelter and safety. In numerous countries political, economic and social turmoil is going on. And we, as therapists, are also affected. Our practices are filled with people in need. A solid model has become an essential requirement for therapists to deal with life's challenges. EFT is a model that gives us a roadmap and is our backbone. In the upcoming World Summit 2024 we will explore the new developments in the EFT-model, EFIT, EFFT and HMT with attention for different groups and cultures.

We aim to inspire and learn together to make this world a safer place!

*Dr. Karin Wagenaar,*

chair of the Dutch EFT Foundation, local organizer
